Strategic Analysis and Action Mary M. Crossan 2015-11-30 Crossan is a concise, practical guide for the strategic management course. The text provides an organized set of concepts and procedures for analyzing and acting on strategic problems. It takes the point of view of the general manager and presents a consistent, operational approach to analyzing and acting on strategic problems. This revision sees the addition of two new authors, who bring a wealth of experience in developing and teaching this course, and a commitment to excellence. The revision revolves around currency, with new and updated examples and cases, as well as reflect changes to strategy practice and theory.

Opportunity Donald Morris 2013-05-28 Donald Morris's Opportunity ... considers choices that promise a significant change in the life of the person making the choice. ... Morris's survey of the literature is wide-ranging in terms of both literary sources and topics considered, thus offering insights to a variety of readers.-Elizabeth R. Eames, Professor Emerita, Philosophy Department, Southern Illinois University; Author of two books on Bertrand Russell's philosophy Can you recognize an opportunity when it comes your way? Even though the concept seems fairly basic, most people harbor regrets about missed opportunities that in retrospect might have significantly improved their lives. This book will give you the critical tools to sort through the complexities that often obscure the perception of an opportunity and help you take full advantage of what author Donald Morris calls high-end opportunities - pivotal situations that can change your life for the better. Morris begins by developing a model of opportunity in the abstract, analyzing its

elements and the contexts and frameworks that affect our recognition of opportunities. Drawing from a wide range of applications, including investing, business, law, criminology, gambling, and even religion, he shows how opportunities can be defined in various contexts. He also examines highly undesirable situations, where opportunity is lacking, such as poverty and historical instances of slavery, to further illustrate, by way of contrast, the defining characteristics of opportunity. How does a significant opportunity differ from a simple option? How does taking advantage of opportunities differ from being an opportunist? Does our ability to predict the future affect our opportunities? What do we mean by equality of opportunity? By addressing these and other probing questions, Morris shows how to develop more critical perceptions of real opportunities. Donald Morris, CPA, Ph.D., is professor of accounting and chair of the Accounting, Finance, and CIS Department at Eastern New Mexico University. The former owner of an accounting firm and a onetime instructor of philosophy, he is the author of *Dewey and the Behavioristic Context of Ethics*.

Measurement in Nursing and Health Research Elizabeth Lenz

2016-07-18 Praise for the Previous Edition: "This is a valuable resource for readers seeking basic to advanced information on measurement. It should be on the bookshelf of all researchers, and a requirement for graduate nursing students." Score: 100, 5 stars -- Doody's Medical Reviews "...this book is a wonderful shelf reference for nurse researchers and investigators who may need to explore content or use content to design, test, select, and evaluate instruments and methods used in measuring nurse concepts and outcomes." --Clinical Nurse

Specialist “Presents clearly the methodological principles for research planning in nursing with examples that facilitate the understanding of them. Excellent.” 5.0 out of 5 stars --Nursing Research This highly popular resource—written in an easy-to-read style and format-- delivers everything nurses and other health researchers need to know about designing, testing, selecting, and evaluating instruments and methods for measurement in nursing. The Fifth Edition features the most current content, strategies, and procedures available with direct applicability to nurses and health researchers engaging in interprofessional research, collaboration, education, and evidence-based practice. Five new chapters focus on challenges to using big data, evaluation and measurement in interprofessional practice and education, metrics and benchmarking in health professions education and practice, and measurement issues in translational science. The book gives particular attention to measurement issues resulting from changes in nursing, health research, and the increased emphasis on and undertaking of interprofessional research and evaluation. Presenting the material in step-by-step format, the book is designed for readers with little or no experience in measurement, statistics, or interprofessional issues. It focuses on increasing the reader’s ability to use measures that are operationalized within the context of theories and conceptual frameworks, derived from sound measurement principles and practices and adequately tested for reliability and validity. Additionally, the text provides a pragmatic account of the processes involved in all aspects of measurement. Studies conducted by nurses and researchers in varied settings illustrate the measurement processes. New to the Fifth Edition: Thoroughly updated and revised Delivers new and emerging strategies Reflects recent changes to nursing, health research, and emphasis on interprofessional research Includes five completely new chapters addressing challenges to using big data, evaluation and measurement in interprofessional practice and education, metrics and benchmarking in health professions education and practice, and measurement issues in translational science
Key Features: Easy-to-read content and format Assumes no prior knowledge of measurement, statistics, or interprofessional issues

Provides studies conducted by nurses and researchers in varied settings
Offers a pragmatic account of the processes involved in all aspects of measurement
