Geographical Thoughts Dr. Govind Prasad 2006-01-01

Uprooting Geographic Thoughts in India Rana Singh 2009-03-26 Under the cultural turn and transformation the new intellectual discourses started in the 21st century to search the roots, have cross-cultural comparison and to see how the old traditions be used in the contemporary worldviews. This book is the first attempt dealing with roots of Indian geographical thoughts since its beginning in 1920. It emphasises identity of India and Indianness and consciousness among dweller geographers in India, development and status of geography and its recent trends, Gaia theory and Indian context in search of cosmic integrity, ecospirituality and global message towards interrelatedness, Hindu pilgrimages and its contemporary importance, Mahatma Gandhi and his contribution to sustainable environmental development for global peace and humanism, and new vision to see meeting grounds of the East and the West on the line of reconstruction and reconciliation in the globalising world. These essays are selective and thematic, therefore overall view of comprehensiveness is lacking. But this book is not the end; obviously it is a beginning as already other volumes in sequence and continuity are in progress. At the end, the lead essays, representative of the three eras, by Spate (1956), Sopher (1973), and Mukerji (1992) are reprinted with a view to assessing the relevance of their challenging message even today.

Paradigmatic Shifts in Geographical Thought Lalita Rana 2020-01-01 In advancing disciplines like Geography, the methodological debate is a sign of health. In Geography, there has been extreme diversity of viewpoints on both philosophy and methodology with constant extension and also a shift in focus. The methodology of geography came under debate for the first time during the middle of twentieth century when the paper published by F.K. Schaefer, an American scholar, brought both the qualitative and quantitative revolution in geographic development. Shortly after this publication were discussed the paradigmatic shifts in a discipline by Thomas S. Kuhn, another American scholar, through his seminal work in which he painted a picture of the development of science quite unlike that had gone before. In order to elucidate this process of development of science Kuhn prepared a model termed as the 'Paradigm of Science'. Distinct parallels may be sought between the historical evolution of scientific discipline as explained by Thomas Kuhn and the historical evolution of the discipline of geography. Seeking inspiration from the works of both of the great scholars mentioned above, the present book examines the evolution of geographical thought from the perspective of Thomas Kuhn. Two publications of mine (2008 & 2014) are on this line only. However, the methodological literature, to understand the philosophical background making possible this disciplinary growth, is too small. The purpose here

is to explore and screen the growth and development of Geography under sequential methodological changes over time in the light of various paradigmatic shifts with the acknowledgement of crises and revolutionary phases of development in the discipline. Accordingly, the work identifies eight paradigmatic shifts intercepted by eight phases of crises in the discipline.
