JSON (JavaScript Object Notation) is a lightweight format that is used for data interchanging. It is based on a subset of JavaScript language (the way objects are built in JavaScript). As stated in the MDN, ... How can I display JSON in an easy-to-read (for human readers) format? I'm looking primarily for indentation and whitespace, with perhaps even colors / font-styles / etc. If you are reading the data from the Internet instead, the same techniques can generally be used with the response you get from your HTTP API (it will be a file-like object); however, it is heavily ... Here the message contains single quotation mark, which is same as the quotation used in JSON. What I do is fill up a string from user inputs such as message. So, I need to escape those kind of special ... I am using jquery, JSON, and AJAX for a comment system. I am curious, is there a size limit on what you can send through/store with JSON? Like if a user types a large amount and I send it through ... JSON objects on the contrary usually contain arbitrary keys, such as: { "some\_key": "some value", "other\_key": "some other value" } Happily, you can create a list of items, which works pretty much as ... Are you sure you want to create JSON and not rather a JS object? Also, what parts of the object are supposed to be variables? How is the first part connected to the second part? If you really want to ... I have a DTO class which I Serialize  
Json.Serialize(MyClass) How can I exclude a public property of it? (It has to be public, as I use it in my code somewhere else) I've opened VS Code's settings.json file many times, and each time I forgot where it was. If I go to File → Preferences → Settings, I get the graphical settings interface (screenshot). I want to open  
JSON is a format that encodes objects in a string. Serialization means to convert an object into that string, and deserialization is its inverse operation (convert string -> object). When transmitting data or ...
