Pausanias's Description of Greece: Commentary on books II-V: Corinth, Laconia, Messenia, Elis Pausanias 1913

Archaeology and History in Roman, Medieval and Post-medieval Greece William Caraher 2008 Bringing together studies of archaeological method and analysis with detailed work of historical interpretation, the papers here demonstrate how analysis informed by multiple disciplines sheds new light on such important topics as the end of Antiquity, the so-called Byzantine Dark Ages, the contours of the emerging Byzantine civilization, and the complex character of identity in post-medieval Greece. More broadly, this volume shows how the study of the material culture of post-classical Greece has made significant contributions to both the larger archaeological and historical discourse.

New Ways of Communicating Archaeology in a Digital World Sofia Fonseca 2024-10-30 This book examines the communication and interaction between archaeologists and the non-archaeological public in a digital age. Moving beyond traditional methods, the book focuses on communication through new (YouTube, MOOCs, TEDx, etc.) and alternative media (virtual and augmented reality, video games, comics, etc.) that connect a traditional archaeological world to a modern digital one. By featuring case studies that make this point, the volume argues for the need to integrate new technologies and media like online education, storytelling, podcasting, and augmented and virtual reality into archaeologists' efforts to communicate their work to the broader society. Drawn from a session at the European Association of Archaeologists Annual Conference in 2018, the book was expanded and enhanced by the inclusion of presentations from the 2020 conference and additional invited papers. The volume presents a variety of approaches to archaeological education that highlight the need for creativity and

resourcefulness in re-thinking archaeological presentations in a digital and virtual environment. This volume is of interest to archaeologists, as well as researchers and practitioners in museology and heritage and serves as a guide for archaeologists interested and involved in the world of non-academic communication. This book invites the reader to be part of a movement that is redefining the dialogue between our past and the future of communication, learning, and digital storytelling.

Ancient Corinth Jennifer Palinkas 2018-04-30 This is the first official guidebook to the site of ancient Corinth published by the ASCSA in over 50 years, and it comes fully updated with the most current information, color photos, maps, and plans. It is an indispensable resource for the casual tourist or professional archaeologist new to the site. The guide begins with a history of Corinth and its excavations and then presents two tours. The first takes visitors through the archaeological site from the Temple of Apollo to the Forum, the Fountain of Peirene, and more. The second tour covers the ancient monuments outside the fenced area of the site, including the Odeion, the Theater, and the Asklepieion, and then the various remains of ancient Corinth located within and outside the ancient Greek walls, including the Sanctuary of Demeter and Kore and the Lechaion Basilica. Short bibliographic notes for many entries lead the reader to fuller descriptions of monuments, objects, and concepts; a glossary is also provided. Interspersed in the text are topographical notes and focus boxes on special topics such as geology, Pausanias, St. Paul, and prehistoric Corinth and the Corinthia.

Greece: The Peloponnese Andrew Bostock 2025-09-26 This new, thoroughly updated fifth edition of Bradt's Greece: The Peloponnese with Athens, Delphi and Kythira remains the only dedicated guidebook to the

southern part of the Greek mainland. It provides more detailed coverage than any other rival guide, making it indispensable for independent and group travellers visiting a fascinating area slightly smaller than Wales. It also incorporates focussed mini-guides to the Greek capital of Athens and the world-famous site of Delphi. The Peloponnese contains a huge diversity of cultural landscapes, from sleepy, white-washed villages to Byzantine churches, medieval fortresses and ancient archaeological sites such as Olympia and Mycenae. In addition to a long Mediterranean coast lined with classic white sandy beaches, the peninsula incorporates towering mountains for hiking and skiing, olive groves which produce the finest fruit, and hillsides covered in flowers. Bradt's Greece: The Peloponnese provides in-depth coverage of well-known sites, including one of Europe's most spectacular train journeys and the tower houses of the famed Mani. Such information is complemented by descriptions of lesser-known attractions often ignored by other books. Those visiting outside of high season can revel in the delights of the wildflowers of spring, the joys of the olive harvest in late autumn and skiing opportunities during the winter. Birds and marine life are also a huge attraction at any season. The guide also focuses on the colourful life of the traditional paneyiri (festivals) and those who still embrace the Greek spirit of philoxenia (hospitality). The guide is packed with information on independent tours and activities, secluded villages and sophisticated towns, agritourism spots, camping under the stars, rustic tavernas and locally grown produce - all reflecting the reality that the Peloponnese, more than any other part of Greece, exemplifies the ideals of 'slow travel'. Originally written by Andrew Bostock, a former resident of the Peloponnese, this fifth edition has been updated by Greece experts Dana Facaros and Mike Gerrard. New elements include refreshed hotel and restaurant listings, and details of new or upgraded museums such as the Epigraphic Museum (in Argos) and archaeological museums in Argos and Sparta.

Corinth in Late Antiquity Amelia R. Brown 2018-02-22 Late antique Corinth was on the frontline of the radical political, economic and

religious transformations that swept across the Mediterranean world from the second to sixth centuries CE. A strategic merchant city, it became a hugely important metropolis in Roman Greece and, later, a key focal point for early Christianity. In late antiquity, Corinthians recognised new Christian authorities; adopted novel rites of civic celebration and decoration; and destroyed, rebuilt and added to the city's ancient landscape and monuments. Drawing on evidence from ancient literary sources, extensive archaeological excavations and historical records, Amelia Brown here surveys this period of urban transformation, from the old Agora and temples to new churches and fortifications. Influenced by the methodological advances of urban studies, Brown demonstrates the many ways Corinthians responded to internal and external pressures by building, demolishing and repurposing urban public space, thus transforming Corinthian society, civic identity and urban infrastructure. In a departure from isolated textual and archaeological studies, she connects this process to broader changes in metropolitan life, contributing to the present understanding of urban experience in the late antique Mediterranean.

Communities in Transition Søren Dietz 2017-11-30 *Communities in Transition* brings together scholars from different countries and backgrounds united by a common interest in the transition between the Neolithic and the Early Bronze Age in the lands around the Aegean. Neolithic community was transformed, in some places incrementally and in others rapidly, during the 5th and 4th millennia BC into one that we would commonly associate with the Bronze Age. Many different names have been assigned to this period: Final Neolithic, Chalcolithic, Eneolithic, Late Neolithic [I]-II, Copper Age which, to some extent, reflects the diversity of archaeological evidence from varied geographical regions. During this long heterogeneous period developments occurred that led to significant changes in material culture, the use of space, the adoption of metallurgical practices, establishment of far-reaching interaction and exchange networks, and increased social complexity. The 5th to 4th millennium BC transition is one of inclusions, entanglements, connectivity, and exchange of ideas, raw materials, finished products

and, quite possibly, worldviews and belief systems. Most of the papers presented here are multifaceted and complex in that they do not deal with only one topic or narrowly focus on a single line of reasoning or dataset. Arranged geographically they explore a series of key themes: Chronology, cultural affinities, and synchronization in material culture; changing social structure and economy; inter- and intra-site space use and settlement patterns, caves and include both site reports and regional studies. This volume presents a tour de force examination of many multifaceted aspects of the social, cultural, technological, economic and ideological transformations that mark the transition from Neolithic to Early Bronze Age societies in the lands around the Aegean during the 5th and 4th millennium BC.

Corinth Charles River Charles River Editors 2017-10-03 *Includes pictures *Includes ancient accounts of Corinth *Includes online resources and a bibliography for further reading Modern perceptions of Classical Greece are almost invariably based on Athens and Sparta, but Corinth was also a key city-state in antiquity. When St. Paul visited in 51 CE, the Corinth he saw was actually a relatively new city, having been built a little over 100 years previously, but he found a city five times larger than Athens at that time and one which was the capital of a prosperous province. However, ancient Corinth had actually been founded in the 10th century BCE and was, for most of its history, the richest port and the largest city in all of Greece. Corinth had a population in excess of 90,000 in 400 BCE, but the Romans leveled this original city in 146 BCE, killing all the male inhabitants and selling the women and children into slavery. The few that survived fled to Delos, and for the next 100 years the site was deserted until Julius Caesar rebuilt it in 44 BCE. The story of the rise and fall of this powerful polis is intriguing, as are the reasons for ancient Corinth's reputation throughout the Greek world for its licentiousness. One of the Greek words for fornication was

korinthiazomai, and while the city's association with sacred prostitutes scandalized contemporary Athenians in particular, it also made the city a favorite destination for many Greeks. Corinth was also where so much of what became recognized as "Greek art and architecture" was first developed, and it was here that Eastern influence on Greece can first and most obviously be detected. The destruction of ancient Corinth marked the end of free Greece, but despite the integral role it played in Hellas, Corinth has never been recognized as a great military or naval power in the way that Athens and Sparta have. It did not boast any exceptional schools of philosophy, nor are there any great buildings still remaining to attest to its successes. Corinth's contribution to the spread of Greek civilization, however, matches if not surpasses all of the more well-known poleis. Corinth also acted as a gateway for many of the artistic ideas from the East that local artisans adapted and developed to produce their own uniquely Corinthian style of pottery and art. In architecture, too, Corinth's contribution was significant, and the Corinthian style was utilized throughout Greece and the Greek world, especially in relation to temple building. The quintessential Greek ship, the trireme, was first developed in Corinth, and its role in defeating the Persians, a defeat that most historians agree changed world history, is still understated, probably because of the credence given to Herodotus' claims about the Corinthians' behavior in that war. The fact that the city was reestablished by Julius Caesar and, even today, is a highly important center of trade suggests that Corinth was destined to be a hub of trading activity and a prosperous city. Still, the advantages conferred by a favorable geographic position had to be seized, and this ancient Corinth did. Its impact on the ancient Greek world, and hence its influence on Western civilization, should not be underestimated, even as it mostly continues to be. *Corinth: The History and Legacy of the Ancient Greek City-State* examines the history of one of Greece's most important poleis. Along with pictures depicting important people, places, and events, you will learn about Corinth like never before.

papers presented at the December 1996 symposium held in Athens to celebrate the 100th anniversary of the American School of Classical Studies excavations at ancient Corinth. The papers are intended to illustrate the range in subject matter of research currently being undertaken by scholars of ancient Corinth, and their inclusion in one volume will serve as a useful reference work for nonspecialists. Each of the topics (which vary widely from Corinthian geology to religious practices to Byzantine pottery) is presented by the acknowledged expert in that area. The book includes a full general bibliography of articles and volumes concerning material excavated at Corinth. As a summary of one hundred years' research it will be useful to generations of scholars to come.

The Regional Production of Red Figure Pottery Stine Schierup

2014-10-27 In the latter part of the fifth century BC, regional red-figure productions were established outside Attica in regional Greece and in the western Mediterranean, propelled by the impact of the art of Attic vase painting. This collection of papers addresses key issues posed by these production centres. Why did they emerge? To what degree was their inception prompted by the emigration of Attic craftsmen in the context of the weakened Attic pottery market at the onset of the Peloponnesian War? How did Attic vase painting influence already existing traditions, and what was selected, adopted or adapted at the receiving end? Who was using red-figure in mainland Greece and Italy, and what were its particular functions in the local cultures? These and more questions are addressed here with the presentation not only of syntheses, but also primary publication of much newly discovered material. Regional production centres covered include those of Euboea, Boeotia, Corinth, Laconia, Macedonia, Ambracia, Lucania, Apulia, Sicily, Locri and Etruria.
