A Guide to Teaching, Parenting and Creating Family Friendly Schools  
Emma Sheppard 2022-12-30 At The MTPT Project we know that teaching can be a sustainable career choice for parents, and in this essential handbook, we show you how. Supported by case studies celebrating the best that the family friendly schools and happy teachers in our community have to offer, this book is a lifeline for both educators aspiring to combine their passion for teaching with becoming a parent, and the school leader who wants to empower them. However you become a parent, or choose to grow your family and your career, this handbook will provide you with the guidance and cheerleading that you need to fulfil your personal and professional aspirations. The book is divided into nine chapters, guiding readers from the first considerations of family planning, all the way through to the reality that some teachers and leaders may choose to leave classrooms for good. Each chapter includes: the latest research on working families legalities associated with different stages of working parenthood (including discrimination and how to avoid it as an employer and address it as an employee) case studies from our community suggestions for individuals and schools recommended further reading. Each chapter will help you to navigate the journey from planning a family, to stepping in and out of teaching to suit your parenting needs, to creating family friendly working environments, whatever your role in school. With its mixture of research-informed solutions, hints and tips, this text is perfect for colleagues embarking on their parenting journey and school leaders who want to take practical steps to retain and empower valued colleagues.

**Development Discourse and Global History** Aram Ziai 2025-09-25

Development Discourse and Global History introduces readers to the shifting ways in which people have been talking and writing about 'development' over time, and the rules governing the conversation. Drawing on the methods of Michel Foucault, Ziai's ground-breaking book traces the origins of development discourse back to late colonialism and notes the significant discontinuities that led to the establishment of a new discourse and its accompanying industry. This book goes on to describe the contestations, appropriations and transformations of the concept over time. It shows that trends which have emerged since the 1980s, such as an emphasis on participation and ownership, sustainable development, and free markets, are incompatible with the original rules and so lead to serious contradictions. The Eurocentric, authoritarian and depoliticising elements in development discourse are uncovered, whilst still recognising its progressive appropriations. This new edition includes revisions throughout, and an important new chapter on race and racism, as well as a discussion of the evolution of the Sustainable Development Goals. This book is perfect for students and researchers in development studies, global history and discourse analysis as well as an interdisciplinary audience from international relations, political science, sociology, geography, anthropology, language and literary studies.

Online Leave Management System Peshraw Mohammed Sulaiman 2017

The aim of this project is to develop an online leave management software system for University of Kurdistan-Hawler also which is useful for most of organizations and colleges. The online leave management system is an intelligent, web-based HRIS and Staff Leave Management system that makes leave approval workflow and all the types of absences, storing staff information, and viewing team calendars easier than ever. This software can be used in many organizations to reduce processing work load and also will reduce paperwork and maintain record in a more efficient and systematic way. The main idea of this project is to develop an online system to handle information staff, staff details, holiday lists, leave details, leave approval, leave cancellation, monthly leaves, monthly leave report, yearly reports and to reduce paperwork and maintain record in a more well-organized and systematic way. This software will help HR of organization to calculate the number of leave taken weekly, monthly and annually and help gather data about multiple leave types and will decrease working time for HR. This system will help each of employees anywhere and anytime has ability to apply and view leave records without the delay of going through of the admin staff. There are some features for this system like cancellation of leave, automatic approval of leave and report generators etc.

**Unlocking the Gates** Taylor Walsh 2010-12-28 How elite universities are entering the world of online education Over the past decade, a small revolution has taken place at some of the world's leading universities, as they have started to provide free access to undergraduate course materials—including syllabi, assignments, and lectures—to anyone with an Internet connection. Yale offers high-quality audio and video recordings of a careful selection of popular lectures, MIT supplies digital materials for nearly all of its courses, Carnegie Mellon boasts a purpose-built interactive learning environment, and some of the most selective universities in India have created a vast body of online content in order to reach more of the country's exploding student population. Although they don't offer online credit or degrees, efforts like these are beginning

to open up elite institutions—and may foreshadow significant changes in the way all universities approach teaching and learning. *Unlocking the Gates* is one of the first books to examine this important development. Drawing on a wide range of sources, including extensive interviews with university leaders, Taylor Walsh traces the evolution of these online courseware projects and considers the impact they may have, both inside elite universities and beyond. As economic constraints and concerns over access demand more efficient and creative teaching models, these early initiatives may lead to more substantial innovations in how education is delivered and consumed—even at the best institutions. *Unlocking the Gates* tells an important story about this form of online learning—and what it might mean for the future of higher education.

**Human Security, Law and the Prevention of Terrorism** Andrej Zwitter

2010-11-23 This study examines two important questions regarding terrorism and political violence: which threats to human security constitute root causes for collective violence and which adequate responses for these root causes are available to the international community. The responses are examined on the basis of international law, in particular human rights law, and within the concept of human

security, with the goal of fostering a long-term reduction in political violence. Drawing on existing political discussions and research about the root causes of terrorism, Zwitter develops a legal framework for the application of legal terrorism prevention tools. This study serves as a framework of action and analysis using concepts and particularly legal frameworks which are already broadly or universally recognized to increase the applicability of the framework without having to invent new legal regimes. In doing so it makes use of the concept of human security for tackling breeding grounds and other facilitators of terrorism making it universally accessible. Combining social science research with legal sociology and international law, this book will be of interest to students and scholars of politics, international relations, security studies, conflict studies and law.

Standing between Life and Extinction David L. Propst 2021-02-15 North American deserts—lands of little water—have long been home to a surprising diversity of aquatic life, from fish to insects and mollusks. With European settlement, however, water extraction, resource exploitation, and invasive species set many of these native aquatic species on downward spirals. In this book, conservationists dedicated to these creatures document the history of their work, the techniques and philosophies that inform it, and the challenges and opportunities of the future. A precursor to this book, *Battle Against Extinction*, laid out the scope of the problem and related conservation activities through the late 1980s. Since then, many nascent conservation programs have matured, and researchers have developed new technologies, improved and refined methods, and greatly expanded our knowledge of the myriad influences on the ecology and dynamics of these species. *Standing between Life and Extinction* brings the story up to date. While the future for some species is more secure than thirty years ago, others are less fortunate. Calling attention not only to iconic species like the razorback sucker, Gila trout, and Devils Hole pupfish, but also to other fishes and obscure and fascinating invertebrates inhabiting intermittent aquatic habitats, this book explores the scientific, social, and political challenges of preserving

these aquatic species and their habitats amid an increasingly charged political discourse and in desert regions characterized by a growing human population and rapidly changing climate.
