

Business Statistics Formula Sheet Probability Chapter

A Course in Business Statistics William Mendenhall 1996 Providing case studies and exercises based on real data, this work on business statistics keeps its coverage of probability to a cursory level, in order to emphasize the application of statistics to business problems.

Complete Business Statistics Amir D. Aczel 1999 An undergraduate textbook for majors in business.

Practical Business Statistics Andrew F. Siegel 1994 Practical Business Statistics, 5/e was written in response to instructors not wanting a formula driven, mathematically encyclopedic book. The use of computer applications means some topics no longer require coverage in detail. This allows future managers to know how to use

and understand statistics. The text does this by using examples with real data that relate to the functional areas of business such as finance, accounting, and marketing. It de-emphasizes the theoretical, and presents the material in a well-written, easy style designed to motivate students. The emphasis is on understanding and applications as opposed to mathematical precision and formula detail.

Newly retitled *The Practice of Statistics for Business and Economics* to reflect the true scope of its coverage, this new third edition of the text is its most accomplished yet--a conceptually rich, mathematically accessible survey of basic statistical methods in a business/economics context that emphasizes working with data and mastering statistical reasoning.
