Be The Family "Computer Hero" Darryl Hicks This book is dedicated to the unsung heroes who provide technology support for the entire family. As capable as they are, even these heroes sometimes face cybersecurity questions. My goal is to offer practical "cheat codes" for protecting your household from cyber crime—and ideally prevent a bad day before it ever begins. While the guidance applies to everyone, the book focuses especially on safeguarding elderly parents and grandparents who may have a sizable nest egg but lack the skills to defend it from bad actors. I won't assume you're a keyboard warrior fluent in cryptic command lines. Instead, you'll get a streamlined, approachable education that goes well beyond the basic copy-and-paste skills you already have. You'll also gain the confidence to become the go-to fixer for Microsoft Windows computers. Your Baby Boomer elders will be genuinely impressed as you thwart attackers and neutralize threats long before they reach the digital doorstep. Inside, you'll find clear tips, practical tricks, and solid advice delivered in bite-sized, easy-to-apply pieces. Think of it as a friendly nudge to help keep your digital life secure—and your loved ones protected. Together, we explore how modern attacks work, how AI is reshaping the threat landscape, the specific risks facing older adults, and the best ways to safeguard your devices. You'll learn how to spot deepfakes, recognize common scams targeting "silver surfer" parents, and understand exactly what to do if you or a loved one becomes a victim. This book

gives you the knowledge you need to protect your family's assets on a realistic budget. While cybersecurity can be a dry topic, it's far more pleasant than dealing with authorities after your identity—or your savings—has been stolen. I sincerely hope these pages help you navigate technology with confidence and keep your family secure.
