Developed by the DVB Project, DVB-I is a specification that provides a common way to describe television services so that any compatible device can present them to the user. New DVB standard for digital satellite communications. Meant to replace DVB-S & DVB-DSNG. The DVB-H technology is a spin-off of the DVB-T standard. It is to a large extent compatible with DVB-T but takes into account the specific properties of typical terminals which are expected to be small, ... DVB has provided the fundamental standards used to deliver digital TV services for more than two decades, including (but not limited to): DVB-T, C and S - transmission over terrestrial, cable and ... Founded in September 1993, the DVB Project is a market-led consortium of public and private

sector organizations in the television industry. Its aim is to establish the framework for the introduction of ... In this chapter, the coding strategies used by both DVB-RCS and DVB-S2 are discussed. The DVB-RCS turbo code was optimized for short frame sizes and high data rates. DVB standards cover all aspects of digital television from transmission through interfacing, conditional access and interactivity for digital video, audio and data.
