China's Industrial Policies and the Global Business Revolution

Ling Liu 2005-07-05 As China

has blended market reforms with comprehensive industrial policies, most research has

focused on the national government's strategies for economic growth. However,

one of the unique characteristics of industrial policy in China is that it

involves government intervention at all levels, from

the political elite all the way down to village leaders. This book focuses on the domestic

appliance industry, and China's three major business groups in this area - Haier, Hisense and

Aucma. The Haier Group, in particular, is one of the most successful and competitive

enterprises in China and is very well-placed to compete globally as the Chinese economy becomes more

integrated with the world trading system. This volume shows how industrial policy is formulated at the national level

and implemented at the local level, and examines how local government frequently

intervenes in local enterprises' business strategy and management. Of practical

importance, this book provides academics, business people and policy makers with

valuable insights into the development process and a concrete understanding of the

challenges faced in the global business revolution by one of the world's most dynamic

economies.
