[ELECTRONICS LAB MANUAL Volume I, FIFTH EDITION](#) NAVAS, K.

A. 2015-09-11 This lab manual is intended to support the students of

undergraduate engineering in the related fields of electronics

engineering for practicing laboratory experiments. It will also be useful

to the undergraduate students of electrical science branches of

engineering and applied science. This book begins with an introduction

to the electronic components and equipment, and the experiments for

electronics workshop. Further, it covers experiments for basic

electronics lab, electronic circuits lab and digital electronics lab. A

separate chapter is devoted to the simulation of electronics experiments

using PSpice. Each experiment has aim, components and equipment

required, theory, circuit diagram, tables, graphs, alternate circuits,

answered questions and troubleshooting techniques. Answered viva voce

questions and solved examination questions given at the end of each

experiment will be very helpful for the students. The purpose of the

experiments described here is to acquaint the students with:

• Analog and digital devices • Design of circuits • Instruments and procedures for

electronic test and measurement

[ELECTRONICS LAB MANUAL \(VOLUME 2\)](#) NAVAS, K. A. 2018-10-01

This book is evolved from the experience of the author who taught all lab courses in his three decades of teaching in various universities in India.

The objective of this lab manual is to provide information to

undergraduate students to practice experiments in electronics

laboratories. This book covers 118 experiments for linear/analog

integrated circuits lab, communication engineering lab, power

electronics lab, microwave lab and optical communication lab. The

experiments described in this book enable the students to learn:

• Various analog integrated circuits and their functions • Analog and

digital communication techniques • Power electronics circuits and their

functions • Microwave equipment and components • Optical

communication devices This book is intended for the B.Tech students of

Electronics and Communication Engineering, Electrical and Electronics

Engineering, Biomedical Electronics, Instrumentation and Control,

Computer Science, and Applied Electronics. It is designed not only for

engineering students, but can also be used by BSc/MSc (Physics) and

Diploma students. KEY FEATURES • Contains aim, components and

equipment required, theory, circuit diagram, pin-outs of active devices,

design, tables, graphs, alternate circuits, and troubleshooting techniques

for each experiment • Includes viva voce and examination questions with

their answers • Provides exposure on various devices TARGET

AUDIENCE • B.Tech (Electronics and Communication Engineering,

Electrical and Electronics Engineering, Biomedical Electronics,

Instrumentation and Control, Computer Science, and Applied

Electronics) • BSc/MSc (Physics) • Diploma (Engineering)
