**Linguistic and Translation Studies in Scientific Communication** M. Lluïsa Gea Valor

2010 This volume offers a collection of papers which seek to provide further insights into the way scientific and technical knowledge is communicated (i.e., written, transmitted, and translated) nowadays, not only in the academic sphere but also in society as a whole. Language in science has traditionally been valued for prioritising objective, propositional content; however, interpersonal and pragmatic dimensions as well as translation perspectives are worth exploring in order to better understand the mechanisms of specialised communication. Accordingly, the contributions in this volume cover topics of special interest to scholars and researchers in the fields of linguistics and translation, such as the popularisation and transmission of scientific knowledge via ICTs; terminology and corpus-based studies in scientific discourse; genres and discourse in scientific and technical communication; the history and evolution of scientific language; and translation of scientific texts.

*Management & Building Engineering* John

Michael Kirby 2012-10-30 "This book looks to cover the differences the new professional will encounter as he takes on his new position overseas". The book not only covers the basic technical translations of the items likely to be encountered during your work, but also covers what I would call the "unspoken word" These are cultural differences, such as technical phrases, modern work concepts terminology, standard practices. The book takes the student through all stages of construction and explains in detail the principal phases that the student is expected to understand & know in the new Hi

tech and fast changing environment. It will be a good reference book which will enable the student to rapidly adapt to their new environment by helping them understand the basic principles, working practices, descriptions etc which some countries will take for granted. A great aid for the aspiring foreign professional, I only wish it was available when I first came to Spain some 23 years ago! Peter Wilkey FCIOB CIOB Ambassador for Spain & Gibraltar ... Este excelente libro es una guía fundamental para los arquitectos españoles u otros profesionales que quieran conocer o desarrollar su labor en un entorno anglosajón... Luis M. Sendra Mengual, Presidente (CTAV) Colegio Territorial de Arquitectos de Valencia ... La vocación de internacionalización se ha convertido ahora en una exigencia que debemos atender... este libro es un importante primer paso... Rafael Sánchez Grandía, Director ESTIE UPV ... Una herramienta útil y una guía eficaz para el profesional de la construcción... José Ramón Roca Rivera, Presidente del Colegio de Aparejadores, Arquitectos Técnicos e Ingenieros de Edificación de Valencia.
