**Financial Management** Petty Martin Burrow & Nguyen  
2008-09-03 "These days it is all too easy for students to lose sight of the logic that drives finance and to focus instead on memorising formulas and procedures. As a result, students have a difficult time understanding the interrelationships between the topics covered in a textbook for a first course in finance. Moreover, later in life when the problems encountered do not fit neatly into the textbook presentation, the student may have problems abstracting from what was learned. To overcome this problem, the opening chapter presents ten basic principles of finance that are woven throughout the book. What results is a text tightly bound around these guiding principles. In essence, the student is presented with a cohesive, interrelated

perspective from which future problems, as yet unknown, can be approached."--Provided by publisher.
