Danger: Diabolik Leon Hunt 2018-02-20 *Danger: Diabolik* (1968) was adapted from a comic that has been a social phenomenon in Italy for over fifty years, featuring a masked master criminal—part Fantômas, part James Bond—and his elegant companion Eva Kant. The film partially reinvents the character as a countercultural prankster, subverting public officials and the national economy, and places him in a luxurious and futuristic underground hideout and Eva in a series of unforgettable outfits. A commercial disappointment on its original release, *Danger: Diabolik's* reputation has grown along with that of its director, Mario Bava, the quintessential cult auteur, while the pop-art glamour of its costumes and sets have caught the imagination of such people as Roman Coppola and the Beastie Boys. This study examines its status as a comic-book movie, including its relation both to the original fumetto and to its sister-film, *Barbarella*. It traces its production and initial reception in Italy, France, the U.S., and the UK, and its cult afterlife as both a pop-art classic and campy "bad film" featured in the final episode of *Mystery Science Theatre 3000*.

Italian Horror Cinema Baschiera Stefano Baschiera 2016-06-14 In its heyday from the late 1950s until the early 1980s Italian horror cinema was characterised by an excess of gore, violence and often incoherent plot-lines. Films about zombies, cannibals and psychopathic killers ensured there was no shortage of controversy, and the genre presents a seemingly unpromising nexus of films for sustained critical analysis. But Italian horror cinema with all its variations, subgenres and filoni remains one of the most recognisable and iconic genre productions in Europe, achieving cult status worldwide. One of the manifestations of a rich production landscape in Italian popular cinema after the Second World War, Italian horror was also characterised by its imitation of foreign models and the transnational dimension of its production agreements, as well as by its international locations and stars. This collection brings together for the first time a range of contributions aimed at a new understanding of the genre, investigating the different phases in its history, the peculiarities of the production system, the work of its most representative directors (Mario Bava and Dario Argento) and the wider role it has played within popular culture.

Graphic Embodiments Lisa DeTora 2021-03-08 Comics and other graphic narratives powerfully represent embodied experiences that are difficult to express in language. A group of authors from various countries and disciplines explore the unique capacity of graphic narratives to represent human embodiment as well as the relation of human bodies to the worlds they inhabit. Using works from illustrated scientific texts to contemporary comics across national traditions, we discover how the graphic narrative can shed new light on everyday experiences. Essays examine topics that are easily recognized as anchored in the body as well as experiences like migration and concepts like environmental degradation and compassion that emanate from or impact on our embodied states. *Graphic Embodiments* is of interest to scholars and students across various interdisciplinary fields including comics studies, gender and sexuality studies, visual and cultural studies, disability studies and health and medical humanities.
