

Globalization The Human Consequences

Globalisation, Human Rights Education and Reforms Joseph Zajda 2016-09-23 This book, the seventeenth instalment in the 24-volume series Globalisation, Comparative Education and Policy Research, explores the interrelationship between ideology, the state and human rights education reforms, setting it in a global context. The book examines major human rights education reforms and policy issues in a global culture. It focuses on the ambivalent and problematic relationship between the state, globalisation and human rights education discourses. Using a number of diverse paradigms, ranging from critical theory to historical-comparative research, the authors examine the reasons for, and the outcomes of human rights education reforms and policy. The authors discuss discourses surrounding the major dimensions affecting the human rights education, namely national identity, democracy, and ideology. These dimensions are among the most critical and significant dimensions defining and contextualising the processes surrounding the nation-building, identity politics and human rights education globally. With this as its focus, the chapters represent hand-picked scholarly research on major discourses in the field of human rights education reforms. The book draws upon recent studies in the areas of globalisation, equality, and the role of the state in human rights education reforms. Furthermore, the perception of globalisation as dynamic and multi-faceted processes clearly necessitates a multiple-perspective approach in the study of human rights education. This book provides that perspective commendably. It also critiques current human rights education practices and policy reforms. It illustrates the way shifts in the relationship between the state and human rights education policy. In the book, the authors, who come from diverse backgrounds and regions, attempt insightfully to provide a worldview of current developments in research concerning human rights education, and citizenship education globally. The book contributes, in a very scholarly way, to a more holistic understanding of the nexus between nation-state, human rights education both locally and globally.

The Sport and Society Reader David Karen 2010 'The Sport and Society Reader' introduces the most important theoretical approaches to the study of sport and comprehensively explores the key themes that define the discipline.

International Human Rights Law Manisuli Ssenyonjo 2016-04-22 This timely and valuable book explores the development of international human rights law over the last six decades. The volume brings together leading experts to reflect on different aspects of human rights law, not only considering and evaluating the developments so far, but also identifying relevant problems and proposing relevant possible perspectives for the continued positive future development of human rights law. The book is international in perspective, both in scope and context, and covers developments in the international protection of human rights since the adoption of the UDHR in 1948. The developments considered include the United Nations system of protecting human rights as well as regional human rights systems in Africa, America and Europe. It also

considers some key themes relevant to human rights including globalisation, protecting human rights in emergency situations and trade sanctions, the development of human rights NGOs, and many others. The book will be an invaluable resource for students, academics and policy-makers working in the field of international human rights.

Globalization and Its Impact on the Full Enjoyment of Human Rights Joseph Oloka-Onyango 2000 Reviews tensions between international economic law and international human rights law, including issues of trade liberalization, intellectual property rights, dispute settlement; poverty eradication and obligations of the international financial institutions; and the role of civil society.

Globalization Zygmunt Bauman 1998-08-25 'Globalization' is a word that is currently much in use. This book is an attempt to show that there is far more to globalization than its surface manifestations. Unpacking the social roots and social consequences of globalizing processes, this book disperses some of the mist that surrounds the term. Alongside the emerging planetary dimensions of business, finance, trade and information flow, a 'localizing', space-fixing process is set in motion. What appears as globalization for some, means localization for many others; signalling new freedom for some, globalizing processes appear as uninvited and cruel fate for many others. Freedom to move, a scarce and unequally distributed commodity, quickly becomes the main stratifying factor of our times. Neo-tribal and fundamentalist tendencies are as legitimate offspring of globalization as the widely acclaimed 'hybridization' of top culture - the culture at the globalized top. A particular reason to worry is the progressive breakdown in communication between the increasingly global and extra-territorial elites and ever more 'localized' majority. The bulk of the population, the 'new middle class', bears the brunt of these problems, and suffers uncertainty, anxiety and fear as a result. This book is a major contribution to the unfolding debate about globalization, and as such will be of interest to students and professionals in sociology, human geography and cultural issues.

Global Prescriptions Rosalind P. Petchesky 2003-08 Global Prescriptions is a critical yet optimistic analysis of the role of transnational women's groups in setting the agendas for women's health in international and national settings. The book reviews a decade of women's participation in UN conferences, transnational networks, national advocacy efforts and sexual and reproductive health provision, assessing both their strengths and weaknesses. It critiques the Cairo, Beijing and Copenhagen conference documents and World Bank, WHO and health sector reform policies. It also offers case studies of national-level reform and advocacy efforts and appraises the controversy concerning TRIPS, trade, and essential AIDS drugs. That controversy, Petchesky argues, starkly illuminates the 'collision course' of transnational corporate and global trade agendas with the struggle for gender, racial and regional equity and the human right to health. The author takes into account the formidable political and ideological forces confronting global justice movements and also offers a sobering reassessment of transnational women's NGOs themselves and such problems as 'NGOization', fragmentation and donor-dependency. Petchesky argues that the power of women's transnational coalitions is only as great as their organic connection with grassroots social movements.

Crossing Textual Boundaries in International Children's Literature Lance Weldy 2011-01-18 "As the first part of the title indicates, my interest in looking at intertextuality and transformation still maintains a prominent place throughout this book as well. If we believe that 'no text is an island,' then we will understand that the relationships between and within texts across the years become a fascinating place for academic inquiry. I included the word 'boundaries' into the title because we never get tired of voicing our opinions about texts which traverse relegated boundaries, such as genre or medium. Not only am I interested in discussing what these changes across boundaries mean socially, historically, and culturally, but also what they mean geographically, which accounts for the second part of my title. "I am very excited

that this book will be placing even more emphasis on children's literature in an international scene than my first book did, in the sense that I have added more scholars on an international level. I hesitate to list the nationalities of all of the contributors here because quite a few have themselves crossed international boundaries in different ways, by either studying abroad or finding permanent residency in foreign countries. Nevertheless, the writers have lived extensively in or identify as being from Australia, Canada, England, Finland, Germany, Greece, Iceland, Ireland, Israel, Norway, Spain, Sweden, Turkey, the United States of America, and Wales." —Introduction

Globalization John Glenn 2012-08-06 Rather than claim that there exists a common concept of globalization that all parties can agree to, this book seeks to examine some of the conceptions and the way in which they render different interpretations of particular aspects of globalization. The last two decades have witnessed an explosive proliferation of academic writings on the subject of globalization, which has been accompanied by a high level of interest in the media and widespread usage of the term. This has inevitably resulted in the meaning of the concept broadening to include a whole host of issues, running the attendant risk of losing any conceptual focus it had. John Glenn examines five issue areas affected by globalization: the economy sovereignty civil society governance communication. In so doing, the book aims to articulate certain questions within each area, which will allow for some judgment to be made concerning the differing perspectives on globalization. Globalization will be of interest to students of international political economy and politics and international relations in general.

Emerging Issues in the 21st Century World-system: New theoretical directions for the 21st century world-system Wilma A. Dunaway 2003 As one-half of the latest edition of Immanuel Wallerstein's Political Economy of the World-System series, this collection offers cutting-edge theoretical directions to explain the structural crises of the 21st-century world-system. Contributors argue that the capitalist world system has reached a critical bifurcation point, a short period which will be characterized by a sudden shift in the long-term structural forces that have created and sustained the world as we know it. Writers challenge conventional thinking about the most significant structural crises that face the 21st-century world-system, including terrorism, debt, the growth of megacities as global actors, the emergence of a powerful transnational capitalist class, and the world ecological crisis.

Globalization Dennis Smith 2006-09-18 In this book, Dennis Smith argues that we need to look afresh at globalization. So far analysts have seen globalization in terms of three logics. Yet these approaches ignore important historical and human aspects of globalization.

Vulnerability Henk ten Have 2016-04-08 Alongside globalization, the sense of vulnerability among people and populations has increased. We feel vulnerable to disease as new infections spread rapidly across the globe, while disasters and climate change make health increasingly precarious. Moreover, clinical trials of new drugs often exploit vulnerable populations in developing countries that otherwise have no access to

healthcare and new genetic technologies make people with disabilities vulnerable to discrimination. Therefore the concept of 'vulnerability' has contributed new ideas to the debates about the ethical dimensions of medicine and healthcare. This book explains and elaborates the new concept of vulnerability in today's bioethics. Firstly, Henk ten Have argues that vulnerability cannot be fully understood within the framework of individual autonomy that dominates mainstream bioethics today: it is often not the individual person who is vulnerable, rather that his or her vulnerability is created through the social and economic conditions in which he or she lives. Contending that the language of vulnerability offers perspectives beyond the traditional autonomy model, this book offers a new approach which will enable bioethics to evolve into a global enterprise. This groundbreaking book critically analyses the concept of vulnerability as a global phenomenon. It will appeal to scholars and students of ethics, bioethics, globalization, healthcare, medical science, medical research, culture, law, and politics.
