*Bibliographic Guide to Law*  
1990

Property Law Alison Clarke  
2005-12-01 An innovative examination of the law's treatment of property, this student textbook provides an extremely useful and readable account of general property law principles. It draws on a wide range of materials on property rights in general, and the English property law system in particular, looking at all kinds of property, not just land. It includes the core legal source materials in property law along with excerpts from social science literature, legal theory, and economics, many of which are not easily accessible to law students. These materials are accompanied by a critical commentary, as well as notes, questions and suggestions for further reading. It will be of interest to undergraduate property law students and to non-law

students taking property law modules in courses covering planning, environmental law, economics and estate management.

**Principles of Corporate Insolvency Law** Royston Miles Goode 2011 Principles of Insolvency Law is widely regarded as 'the' text on Insolvency law. Professor Sir Roy Goode's reputation as the "doyen of commercial law" has established a unique position for the Work as a leading authority in the field. The book provides a clear and concise treatment of the general philosophical principles

underpinning Insolvency law. It works as an introduction to this complex area and as such it has a broad market, ranging from students and newly qualified practitioners to barristers in Court.

*Statutory Priorities in Corporate Insolvency Law*  
 Christopher F. Symes  
 2016-12-05 Who enjoys statutory preferred creditor status? What justifications exist for jurisdictions to maintain statutes that favour 'priority' creditors over other creditors and contributories? This book examines preferential debts derived from specific legislative provisions applying to corporate insolvency. In exploring the concept of preferential treatment, *Statutory Priorities in Corporate Insolvency Law* includes chapters that provide a doctrinal, theoretical and historical analysis of who enjoys preferred creditor status. As well as examining the traditional major categories

of priorities, this work also identifies potential new categories for priority status such as environmental clean-up costs, international creditors, tort claimants and consumers among other non-consensual creditors. While the study focuses on Australian corporate insolvency law, where appropriate, comparisons are made with other common law jurisdictions, particularly the UK, Canada, New Zealand and the US.

*Predatory Lending and the Destruction of the African-American Dream* Janis Sarra
