Effect of Outdoor Education Methods and Strategies on Student Engagement in Science Daniel William Rudolf 2012 Keystone Science School (KSS) is a residential outdoor education facility set high in the Rocky Mountains of Colorado. Initially as a classroom teacher in a nearby town, I observed first-hand the positive impact of experiences had by my students at KSS on their attitudes toward learning science. This research was designed as a descriptive study to analyze how KSS uses outdoor methods and strategies to positively effect student attitudes toward learning science. Over the course of several weeks, participating students and teachers were surveyed about their experiences (typically 3-day/2-night) at Keystone Science School. Instructors and field groups were also observed on several occasions to analyze the degree to which particular methods and strategies were being employed, and their effectiveness on student interest and engagement in science. The results suggest that with an overwhelming positive view from students and teachers about the effectiveness of their outdoor learning experiences, student age, student gender, and instructor gender had some effect on these attitudes. Boys tended to be slightly more comfortable learning outdoors than girls, and younger students (ages 9-11) generally more comfortable than older students (ages 12-14) especially among girls. Students also reported being slightly more comfortable learning outdoors with male instructors, and tended to rate the abilities of male instructors slightly higher. The findings of this result support the conclusion that methods and strategies used in outdoor education are more effective at developing positive attitudes toward learning science than typical classroom experiences.

Outdoor Education Ken Gilbertson 2006 "Outdoor Education: Methods and Strategies applies educational theories to outdoor teaching methods and helps educators learn how to choose the instructional strategies that will best work for their audiences, whether they're in a school, nature center, adventure center, camp, environmental learning center, government agency, or university." "Outdoor Education: Methods and Strategies provides practical lesson plans and examples that go beyond the normal scope of a text. It will benefit both new and veteran educators by teaching them how to enhance their audience's awareness, appreciation, and knowledge of the outdoors. Ultimately, it will advance educators' abilities to increase people's enjoyment and understanding of the environment."--BOOK JACKET.

Teaching in the Outdoors Donald R. Hammerman 1994 Three outdoor educators named Hammerman explain the philosophy and techniques they have developed for exposing elementary-school aged children to a wide range of subjects outdoors. First they explain why to do it. Then they look at extending the curriculum, outdoor laboratories, resident programs, evaluating procedures, lessons for educators, and the history of outdoor education. Earlier editions appeared from 1964 to 1994; the fifth includes electronic information sources. Annotation copyrighted by Book News Inc., Portland, OR
