Technology of Extracted Phosphoric Acid B. A. Konilev 1975

## **Routledge Handbook of the Extractive Industries and Sustainable Development**

Natalia Yakovleva 2022-05-30 The Routledge Handbook of the Extractive Industries and Sustainable Development provides a cutting-edge, comprehensive overview of current trends, challenges and opportunities for metal and mineral production and use, in the context of climate change and the United Nations Sustainable Development Agenda 2030. Minerals and metals are used throughout the world in manufacturing, construction, infrastructure, production of electronics and consumer goods. Alongside this widespread use,

extraction and processing of mineral resources take place in almost every nation at varying scales, both in developing countries and major developed nations. The chapters in this interdisciplinary handbook examine the international governance mechanisms regulating social, environmental and economic implications of mineral resource extraction and use. The original contributions, from a range of scholars, examine the relevance of the mining industry to the United Nations Sustainable Development Goals (SDGs), reviewing important themes such as local communities Indigenous peoples, gender equality and fair trade, showing how mining can influence global sustainable development. The chapters are organised into three sections: Global Trends in Mineral Resources

Consumption and Production; Technology, Minerals and Sustainable Development; and Management of Social, Environmental and Economic Issues in the Mining Industry. This handbook will serve as an important resource for students and researchers of geology, geography, earth science, environmental studies, engineering, international development, sustainable development and business management, among others. It will also be of interest to professionals in governmental, international and non-governmental organisations that are working on issues of resource governance, environmental protection and social justice.

Updated as of May 29, 2018 This action finalizes amendments to the National Emission Standards for Hazardous Air Pollutants (NESHAP) for the Phosphoric Acid Manufacturing and Phosphate Fertilizer Production source categories. These final amendments are in response to two petitions for reconsideration filed by industry

stakeholders on the rule revisions to the NESHAP for the Phosphoric Acid Manufacturing and Phosphate Fertilizer Production source categories that were promulgated on August 19, 2015. We are revising the compliance date by which affected sources must include emissions from oxidation reactors when determining compliance with the total fluoride emission limits for superphosphoric acid (SPA) process lines. In addition, we are revising the compliance date for the monitoring requirements for low-energy absorbers. We are also clarifying one option and adding a new option, to the monitoring requirements for low-energy absorbers. This book contains: - The complete text of the Phosphoric Acid Manufacturing and Phosphate Fertilizer Production Risk and Technology Review Reconsideration (US Environmental Protection Agency Regulation) (EPA) (2018 Edition) - A table of contents with the page number of each section

Teil 2 widmet sich in sechs Kapiteln den zugrunde liegenden Ressourcentechnologien und -strategien. Dabei geht es darum, was Politik konstruktiv bewirken kann, und um Standortinteressen und Wettbewerbsfähigkeit, um kreative und potenziell innovative neue Lösungsansätze und die gegenseitige Beeinflussung dieser Parameter. Der abschließende Teil 3 richtet den Blick am weitesten in die Zukunft (bis 2065) und zeigt in drei Kapiteln zukünftige Herausforderungen und Lösungsansätze aus technologischer und aus gesellschaftspolitischer Sicht. Die vier Herausgeber von der TU Bergakademie Freiberg haben die Autoren danach ausgewählt, dass sie ein in sich geschlossenes Thema aus verschiedenen Blickwinkeln beleuchten. So ist das Buch beinahe ein „Who is Who“ der weltweiten Spezialisten zum Thema. Es ergänzt die Titel

Strategische Rohstoffe und Energie und Rohstoffe bei Springer Spektrum und fokussiert auf dem aktuellen Stand von Forschung, Technologien und gesellschaftspolitischer Entwicklung. Die einzelnen Kapitel sind aufeinander abgestimmt und miteinander durch Querverweise vernetzt. Ein ausführliches Sachverzeichnis hilft bei der Orientierung jenseits des Inhaltsverzeichnisses. Hilfreiche und optisch ansprechende Grafiken erleichtern das Verständnis der einzelnen Themen. Die Kapitel zeigen präzise die jeweiligen Informationsquellen und bieten in vielen Fällen weiterführende Literatur, die es Lesern erlaubt, noch tiefer in die Thematik einzudringen.

**Phosphoric Acid** Rodney Gilmour 2013-12-12  
The rise and rationalization of the industrial phosphates industry have gone hand in hand with the development and maturation of technologies to purify phosphoric acid. In the 1960s and 70s, driven by the exponential sales growth of the detergent-builder sodium

tripolyphosphate, chemical producers raced to develop processes that would provide a sufficiently pure phosphoric acid feedstock for manufacture to undercut thermal phosphoric acid made from phosphorus. As environmental and political pressure led to a collapse in demand for sodium tripolyphosphate in the 1990s, the commercial pressures to rationalize at plant and corporate levels rose such that only the fittest survived. Phosphoric Acid: Purification, Uses, Technology, and Economics, the first and only book of its kind to be written on this topic, covers the development of purification technologies for phosphoric acid, especially solvent extraction, describing the more successful processes and setting this period in the historical context of the last 350 years. Individual chapters are devoted to the key derivative products which are still undergoing active development, as well as to sustainability and how to approach the commissioning of these plants. The text is aimed at students of

chemistry, chemical engineering, business, and industrial history, and to new entrants to the industry.
