Psychology Don H. Hockenbury 2008-12-19

More than any other psychology textbook, Don and Sandra Hockenbury's Psychology relates the science of psychology to the lives of the wide range of students taking the introductory course. Now Psychology returns in a remarkable new edition that shows just how well-attuned the Hockenburys are to the needs of today's students and instructors. Psychology began with a basic idea: combine scientific authority with a narrative that engages students and relates to their lives. From decades of experience teaching, the Hockenburys created a book filled with cutting-edge science and real-life stories that draw students of all kinds into the course.

Work, Sleep, Repeat Felix Stein 2020-07-12

Work, Sleep, Repeat is a fascinating account of the work regime of German management consultants. Examining one of the most sought-after - and secretive - graduate professions, the book provides a first-hand account of the boardroom culture of Europe's strongest economy. Analyzing how knowledge and power operate in this sector, Felix Stein explores a number of paradoxes. For example, while it is the job of management consultants to analyse the activities of other employees, they actually

spend most of their time in luxurious seclusion away from them. In addition, despite having a strong sense of the importance of their work, consultants often find it difficult to explain to outsiders what it is they do. The book addresses these and other paradoxes by arguing that consultants are engaged in abstract labour. Anthropologists have long struggled with the question of how to describe contemporary work regimes which do not produce anything tangible. Stein demonstrates that elite work is predominantly abstract, in the fourfold sense that it is epistemically removed from the object of analysis, emotionally detached from it, several steps away from the assumed sources of economic value creation, and increasingly hard to grasp. In doing so, he offers new ways to think about white collar work and elites in the 21st century and establishes the notion of 'abstract labour' as a key category in social anthropology.

*The Temple Sleep of the Rich Young Ruler*

Edward Reaugh Smith 2011-11 Who wrote the Gospel of John? The author identifies himself only as "the disciple whom Jesus loved," and Christian tradition tells us that this disciple was the apostle John. However, during the past

century, scholars have increasingly come to doubt that attribution. In 1902, Rudolf Steiner wrote that the author of the Gospel of John was in fact Lazarus. Steiner's position stemmed from his insight that Lazarus's encounter with death involved far more than people realized --an initiation into higher spiritual realities that uniquely qualified him to write this gospel. Edward Smith takes up this argument and shows that subsequent research has tended to favor Lazarus for reasons grounded in John's Gospel itself. More important, Smith shows that subsequent discoveries at Nag Hammadi and Mar Saba corroborate Steiner's reasoning about the nature of the raising of Lazarus, pointing to Lazarus as "the rich young ruler" of Mark's Gospel.
