The Population Council Annual Report Population Council 1980
Islamic Economics, Growth and Development Mustafa Metin Başbay
2025-09-01 The study of economic development is inherently grounded in philosophical and ethical assumptions. In other words, to discuss economic development either at a conceptual level or as a real process necessitates an ethical and philosophical basis. The authors of this book believe that Islamic economics can serve as such a basis, one that emanates from Islamic principles and values. This book presents a distinctive ethical and philosophical framework, one that is grounded in Islamic principles and the established literature of Islamic economics and finance, to analyse and interpret the concept of economic development, as well as to propose policy solutions to real-world development problems and challenges. The book contains theoretical and empirical studies, which connect the literature of Islamic economics with economic development. While some chapters discuss development at the conceptual/philosophical level, others examine the real-world issues faced by developing countries. It proposes institutional constructs as well as concrete public policies to face developmental challenges, such as fighting poverty and inequality, environmental and social sustainability, industrialisation and industrial policy and social services and human capital. Serving as both an introduction and a comprehensive resource, this book illustrates how the concepts and problems of economic development can be examined from an Islamic economics perspective, and, as such, will equip researchers and students with a basic understanding of how Islamic economics interacts with the issues of economic development.

Reflections on Economic Development Michael P. Todaro 1995 Michael P. Todaro's pioneering work on economic development has been noted for its openness to new forms of analysis, fresh methods of perceiving economic behaviour and the consideration of the complex array of 'non-economic' variables that assume such significance in the economic life of developing nations. *Reflections on Economic Development* brings together a collection of Professor Todaro's most significant essays focused on a wide range of topics in economic development including rural - urban migration, international legal and illegal migration, population growth, technological change, education, the environment and ethics. Insightful, informative and stimulating, this collection will be welcomed by all those interested in the broad contribution made by this leading development economist.

Geoeconomics of the Sustainable Development Goals Lucía Morales
2025-03-31 In 2015, the United Nations introduced its very ambitious 2030 Agenda, known as the Sustainable Developmental Goals or SDGs. The SDGs provide a comprehensive list of goals and targets to address social, economic and environmental issues. In this book, different areas of expertise are brought together, examining the main challenges associated with the effects of "climate change" and the broader scope of the SDGs through the lenses of the geo-economics and geopolitics of sustainability. The book sheds light on the growing connections between the economic and financial fields and their impact on defining the international order and its economy. It examines the importance of trade and economic integration in promoting sustainable development and achieving the SDGs. The role of supranational organisations like the United Nations, the World Trade Organisation and the IMF in supporting the SDGs within the context of the world's most advanced economies and those less developed; the influence of economic diplomacy and geopolitical rivalries on progress towards the SDGs; the changing global balance of power and the significance of technology and innovation; as well as the role of emerging and less developed economies in enabling sustainable development. The book offers insights into practical issues linked to theory and applied frameworks, underscoring the significant challenges associated with sustainable development, the global economic and political reality, and how political tensions affect the global economy. The book supports students through the established disciplines of economics, finance, political science, and law and provides academics with new research and theory-building tools.

African Economic Development Steven Langdon 2018-03-05 Sub-Saharan Africa is at a turning point. The barriers to economic growth seen in the 1980-2000 era are disappearing and new optimism is spreading. However, difficult goals of eliminating poverty, achieving equity and overcoming environmental threats continue. This much-

needed and insightful textbook has been written to help us understand this combination of emerging improvements and significant challenges. Opening with an analysis of the main theories relating to development in Sub-Saharan Africa, the book explores all the key issues, including: Human development; Rapid urbanization; Structural and gender dimensions; Sustainable development and environmental issues; and Africa's role in the world economy. The authors use economic tools and concepts throughout, in a way that makes them accessible to students without an economics background. Readers are also aided by a wide range of case studies, on-the-ground examples and statistical information, which provide a detailed analysis of each topic. This text is also accompanied by an e-resource, featuring additional sources for students and instructors. *African Economic Development* is a clear and comprehensive textbook suitable for courses on African economic development, development economics, African studies and development studies.

International Social Work David Cox 2012-12-04 *International Social Work: Issues, Strategies, and Programs, Second Edition* draws together the practice wisdom emerging within the broad scope of international social work practice and its role in contributing to the international community's efforts in combating the major global social problems of poverty, conflict and postconflict reconstruction, the development of countries and disadvantaged populations, migration and displacement, and the needs of specific populations such as child soldiers and AIDS orphans. Utilizing an integrated perspectives approach incorporating global, human rights, ecological and social development perspectives, the *International Social Work, 2e* is designed to prepare social workers, human services professionals, development practitioners who desire to play significant roles in responding to modern global challenges that are critical to the well-being of people, communities, nations and ultimately of us all.

Human Progress and the Rising South Khalid Malik 2013 "The twenty-first century is witnessing a profound shift in global dynamics of unprecedented speed and scale, driven by the fast-rising powers of the developing world. What are these countries doing right? What are their biggest challenges in the years ahead? How will this dramatic reshaping of world politics and economics affect the wealthy industrial North, as well as the poorest nations now clustered at the bottom of the Human Development Index? UNDP's widely praised 2013 Human Development Report, *The Rise of the South: Human Progress in a Diverse World*, addresses these questions by analysing more than forty countries in the developing world that have posted unusually rapid human development gains in recent decades, drawing heavily on background research commissioned from eminent economists, demographers and social scientists. This companion volume to the 2013 Human Development Report presents nine of those research papers."--Publisher website.

Development Management Justice Nyigmah Bawole 2016-10-04 Despite significant financial investments, the rate of development and pace of poverty reduction in developing and transitional countries has not always matched expectations. Development management typically involves complex interactions between governmental and non-governmental organisations, donors and members of the public, and can be difficult to navigate. This volume brings together a group of international contributors to explore the theoretical and empirical underpinnings of development management, and to consider the prospects and challenges associated with it in the context of both developing and transitional countries. Referring to dominant norms and values in public and developmental organisations, development management is tied up with the attitudes and perceptions of various stakeholders including: government officials, public sector managers, aid workers, donors and members of the public. Attempting to make sense of complex interactions between these actors is highly problematic and calls for new approaches, models and insights. Based on cutting-edge research, the chapters challenge much of the previous discourse on the subject and evaluate the challenges and opportunities that it presents. *Development Management* offers academics, researchers and

practitioners of public administration, business and management, international development and political science a comprehensive and state-of-the-art review of current research on development management in the context of developing and transitional countries.
