Managing Logistics and Transportation in the Public Sector Darin L. Matthews 2022-07-28 *Managing Logistics and Transportation in the Public Sector, Second Edition* thoroughly examines the world of

Through the use of case studies and transportation industry resources, *Managing Logistics and Transportation in the Public Sector, Second Edition* offers a complete package for professionals looking to enhance their knowledge of logistics and transportation, as well as for university courses on transportation, supply chain management, and public procurement.

The Report: Nigeria 2024 Oliver Cornock Nigeria's global strategic importance derives from its position as having both Africa's largest population and economy, a reality undergirded by the entrepreneurial drive of its young population. Despite the lingering effects of the Covid-19 pandemic on the economy, aggressive intervention programmes by the Central Bank of Nigeria and support from international partners fuelled a recovery in 2021, with GDP growing 3.6% that year and 3.3% in 2022 after contracting 1.8% in 2020. Growth is projected to drop slightly to 3.2% in 2023.

Dynamics in Logistics Hans-Dietrich Haasis 2008-05-08 Logistic problems can rarely be solved satisfyingly within one single scientific discipline. This cross-sectional character is taken into account by the Research Cluster for Dynamics in Logistics with a combination of economical, information and production technical and enterprise-oriented research approaches. In doing so, the interdisciplinary cooperation between university, research institutes and enterprises for the solution of logistic problems is encouraged. This book comprises the edited proceedings of the first International Conference on Dynamics in Logistics LDIC 2007. The scope of the conference was concerned with the identification, analysis, and description of the dynamics of logistic processes and networks. The spectrum reached from the planning and modelling of processes over innovative methods like autonomous control and knowledge management to the new technologies provided by radio frequency identification, mobile communication, and networking. Two invited papers and of 42 contributed papers on various subjects give an state-of-art overview on dynamics in logistics. They include routing in dynamic logistic networks, RFID in logistics and manufacturing networks, supply chain control policies, sustainable collaboration, knowledge management and service models in logistics, container logistics, autonomous control in logistics, and logistic process modelling. *Using Performance Information to Facilitate Decisionmaking in Transportation Logistics* James Shuler 2009-09-08 This book assesses whether, and to what extent, senior logistics executives use performance information when making logistics-related decisions. The research examines the performance management and measurement systems and processes within three major government organizations; determines what conditions, if any, affect logistics processes and how the organizations measure them; and explores whether senior officials use this information in their decisionmaking. Case studies were conducted on the United States Department of Defense (DOD), the United States Postal Service (USPS), and the United States Department of Energy (DOE). Based on 12 critical practices that the United States General Accounting Office has identified for federal agencies to use in assessing compliance with the Government Performance and Results Act of 1993 (GPRA), 28 evaluation factors were used to assess the use of performance information at four logistical levels within each agency.
