Short Circuits in Power Systems Ismail Kasikci 2018-02-27 Reflecting the changes to the all-important short circuit calculations in three-phase power systems according to IEC 60909-0 standard, this new edition of the practical guide retains its proven and unique concept of explanations, calculations and real-life examples of short circuits in electrical networks. It has also been completely revised and expanded by 20% to include the standard-compliant prevention of short circuits in electrical networks for photovoltaics and wind energy. By understanding the theory any software allows users to perform all the necessary calculations with ease so they can work on the design and application of low- and high-voltage power systems. This book is a practitioner's guide intended for students, electrical engineers, engineers in power technology, the electrotechnical industry, engineering consultants, energy suppliers, chemical engineers and physicists in industry.

Switchgear and Control Handbook Robert W. Smeaton 1998 A switchgear is a device that opens and closes an electrical circuit (the simplest example being a light switch). These devices are important in the function of electrical systems in power stations as well as commercial and industrial facilities. This edition aims to cover all the major aspects of switchgear design, applications, safety and maintenance. With the expansion in the use of computers, solid state control devices and programmable controls, engineers, electrical contractors and other technical specialists need an understanding of the information provided in this book to meet today's needs in selecting and specifying switchgear and control equipment. Features of this third edition include sections on lighting protection for buildings, electrical equipment and distribution systems, high and low voltage electrical distribution cable, machine and process line control using programmable controllers and computers.

Towards a Sustainable Construction Industry: The Role of Innovation and Digitalisation Clinton Aigbavboa 2023-04-23 This book gathers papers from the 12th Construction Industry Development Board (CIDB) Postgraduate Research Conference, which was held at the International Convention Centre, East London, Eastern Cape, South Africa, from July 10 to 12, 2022. The conference directly addresses the objectives of SDG9: "Building resilient infrastructure, promoting inclusive and sustainable industrialization and fostering innovation". Moreover, the conference is designed to promote capacity development and transformation within the built-environment space by providing an all-inclusive platform to established and emerging researchers to discuss the recent advancements needed to move the industry forward.
