Using the ATI Test as a Predictor of NCLEX-RN Success Sara Miles 2009 The National Council Licensure Examination for Registered Nurses (NCLEX-RN) is a standardized exam that all pre-licensure graduates of nursing programs in the United States must pass to obtain professional registered nurse licensure. Predicting NCLEX-RN success is an ongoing concern of students, educators, and schools of nursing. Computerized exams such as the Assessment Technologies Institute (ATI) exams are commonly used in many nursing programs as a tool to help predict success. At a private Midwestern university, a retrospective study was conducted to determine if a relationship existed between performance on the ATI exams and NCLEX-RN success. Two graduating classes (n = 37) of pre-licensure students were studied to determine the accuracy of predicting NCLEX-RN success using the ATI exams. Data were collected on student performance on ten ATI exam scores: Test of Essential Academic Skills (TEAS) test, Critical Thinking Composite, Fundamentals, Pharmacology, Pediatrics, Maternal Newborn, Mental Health, Medical Surgical, Community, and the Registered Nurse (RN) Predictor Exam. A questionnaire was sent to faculty administering the ATI to examine the emphasis placed on the exams. While the ATI exam scores strongly correlate with NCLEX-RN success, the results do not appear to be predictive of NCLEX-RN success within the sample size of this study. *Pharmacology for Nursing Practice* Assessment Technologies Institute 2004 This review module is a component of the Comprehensive Assessment and Review Program and is designed to be used in conjunction with content area exams. It includes key points and critical thinking exercises (with answer keys) for nursing management for a variety of conditions.
