The Telecommunications Fact Book and Illustrated Dictionary Ahmed S. Khan 1992 Your source for the latest terms and concepts used today in the field of telecommunications! The objective of this book is to provide a self-contained quick-reference to telecommunications jargon and facts in a clear concise manner. The unique feature of this book is its illustrated approach. The Telecommunications Fact Book and Illustrated Dictionary consists of two parts: the first part defines the telecommunications jargon related to voice, data, video, electronic, satellite, and fiber optics communications. The second part provides a database for facts and figures related to various facets of the telecommunications field.

Measurements for Competitiveness in Electronics 1993 Identifies currently unmet measurement needs most critical for the U.S. electronics industry to compete successfully worldwide. Includes: role of measurements in competitiveness, & overview of U.S. electronics & electrical-equipment industries. Nine subfields of electronics are covered: semiconductors, magnetics, superconductors, microwaves, lasers, optical-fiber communications, optical-fiber sensors, video, & electromagnetic compatibility. Extensive references. Charts, tables & graphs.

Books in Print Supplement 1985

Antennas and Wave Propagation G. S. N. Raju 2006 Antennas and Wave Propagation is written for the first course on the same. The book begins with an introduction that discusses the fundamental concepts, notations, representation and principles that govern the field of antennas. A separate chapter on mathematical preliminaries is discussed followed by chapters on every aspect of antennas from Maxwell's equations to antenna array analysis, antenna array synthesis, antenna measurements and wave propagation.

Wireless Communication Electronics Robert Sobot 2012-02-18 This book is intended for senior undergraduate and graduate students as well as practicing engineers who are involved in design and analysis of radio frequency (RF) circuits. Detailed tutorials are included on all major topics required to understand fundamental principles behind both the main sub-circuits required to design an RF transceiver and the whole communication system. Starting with review of fundamental principles in electromagnetic (EM) transmission and signal propagation, through

detailed practical analysis of RF amplifier, mixer, modulator, demodulator, and oscillator circuit topologies, all the way to the system communication theory behind the RF transceiver operation, this book systematically covers all relevant aspects in a way that is suitable for a single semester university level course.

Signal Processing Techniques for Communication K.C. Raveendranathan 2024-10-30 The reference text discusses signal processing tools and techniques used for the design, testing, and deployment of communication systems. It further explores software simulation and modeling tools like MATLAB, GNU Octave, Mathematica, and Python for modeling, simulation, and detailed analysis leading to comprehensive insights into communication systems. The book explains topics such as source coding, pulse demodulation systems, and the principle of sampling and aliasing. This book: Discusses modern techniques including analog and digital filter design, and modulation principles including quadrature amplitude modulation, and differential phase shift keying. Covers filter design using MATLAB, system simulation using Simulink, signal processing toolbox, linear time-invariant systems, and non-linear time-variant systems. Explains important pulse keying techniques including Gaussian minimum shift keying and quadrature phase shift keying. Presents signal processing tools and techniques for communication systems design, modeling, simulation, and deployment. Illustrates topics such as software-defined radio (SDR) systems, spectrum sensing, and automated modulation sensing. The text is primarily written for senior undergraduates, graduate students, and academic researchers in the fields of electrical engineering, electronics and communication engineering, computer science, and engineering.
