Programming with Java IDL Geoffrey Lewis 1998 Combining the versatility of Java with the interoperability of CORBA, Java IDL (Interface Definition Language) lets you build object-oriented systems that freely interact over the Internet or intranets, regardless of ORB or programming language. Now Programming with Java IDL offers Java developers a quick, easy

way to fully master this important new Web development tool. With this valuable guide, developers learn Java IDL programming by actually building powerful applications using distributed objects. Experts Geoffrey Lewis, Steven Barber, and Ellen Siegel first bring you up to speed on CORBA, Java, and Java IDL basics. They provide you with step-by-step instructions and source code (also available at the companion Web site) to build three full-fledged distributed systems of increasing complexity. Then, combining valuable insider tips with business system programming savvy, they show you how to quickly modify the code to build your own powerful custom applications. A hands-on guide to harnessing the power of Java and CORBA to create super-versatile business applications, Programming with Java IDL is an indispensable working resource for Java developers. Visit the companion Web site at www.wiley.com/compbooks/lewis There you'll find: * All the source code from the book *

Java Programming Joyce Farrell 2003 Java Programming, Second Edition, is written and designed specifically for students with no previous programming experience. Object-oriented techniques are introduced early, featuring short code examples that are built from the bottom up. Java applications are introduced prior to applets so students understand the programming process more thoroughly, in a simplified environment. The second edition has been modified to include additional student exercises; explanations and examples using the StringBuffer class; and a whole chapter explaining Swing. Swing components are used in place of AWT components.
