Analysis is the process of examining and evaluating a subject, problem, or situation by breaking it down into its individual components and studying their relationships, patterns, and properties. For analysis is the converse of synthesis. Synthesis is the road from the principles to those things that derive from the principles, and analysis is the return from the end to the principles. ANALYSIS definition: 1. the act of studying or examining something in detail, in order to discover or understand more.... Learn more. An analysis is an explanation or description that results from considering something carefully. ANALYSIS definition: the separating of any material or abstract entity into its constituent elements (opposed to synthesis). See examples of analysis

used in a sentence. the ascertainment of the kind or amount of one or more of the constituents of materials, whether obtained in separate form or not. Cf. qualitative analysis, quantitative analysis. The meaning of ANALYSIS is a detailed examination of anything complex in order to understand its nature or to determine its essential features : a thorough study. The separation of a substance into its constituent elements to determine either their nature (qualitative analysis) or their proportions (quantitative analysis).
