Why States Recover Greg Mills 2015-01-03 State failure takes many forms. Somalia offers one extreme. The country's prolonged civil war led to the collapse of central authority, with state control devolving to warlord-led factions that competed for the spoils of local commerce, political power, and international aid. Malawi, on the other hand, is at the other end of the scale. During President Bingu's second term in office, the country's economy collapsed as a result of poor policies and Bingu's brand of personal politics. On the surface, Malawi's economy seemed largely stable; underneath, however, the polity was fractured and the economy broken. In between these two extremes of state failure are all manner of examples, many of which Mills explores in the fascinating and profoundly personal *Why States Recover*. Throughout he returns to his key questions: how do countries recover? What roles should both insiders and outsiders play to aid that process? Drawing on research in more than thirty countries, and incorporating interviews with a dozen leaders, Mills examines state failure and identifies instances of recovery in Latin America, Asia, and Africa. For anyone interested in the reasons behind states' failure, and remedies to ensure future economic stability, it is important reading.

Capitalist Nigger Chika Onyeani 2012-03-27 *Capitalist Nigger* is an explosive and jarring indictment of the black race. The book asserts that the Negroid race, as naturally endowed as any other, is culpably a non-productive race, a consumer race that depends on other communities for its culture, its language, its feeding and its clothing. Despite enormous natural resources, blacks are economic slaves because they lack the 'devil-may-care' attitude and the 'killer instinct' of the Caucasian, as well as the spider web mentality of the Asian. A *Capitalist Nigger* must embody ruthlessness in pursuit of excellence in his drive towards achieving the goal of becoming an economic warrior. In putting forward

the idea of the *Capitalist Nigger*, Chika Onyeani charts a road to success whereby black economic warriors employ the 'Spider Web Doctrine' - discipline, self-reliance, ruthlessness - to escape from their victim mentality. Born in Nigeria, Chika Onyeani is a journalist, editor and former diplomat.

Handbook on Wealth and the Super-Rich Iain Hay 2016-01-29 Fewer than 100 people own and control more wealth than 50 per cent of the world's population. The *Handbook on Wealth and the Super-Rich* is a landmark multidisciplinary evaluation of both the lives and lifestyles of the super-rich, as well as the processes that underpin super-wealth generation and its unequal distribution. Drawing on international case studies, leading experts from across the social sciences offer 22 accessible and coherently organized chapters, which critically analyse a range of topics including: • the legitimacy of extreme wealth from a moral economic perspective • biographies of illicit super-wealth • London's housing markets • how the very wealthy fly • the environmental consequences of super-rich lives • crafting immigration policies to attract the rich. Students and scholars studying a host of topics such as development studies, economics, geography, history, political science and sociology will find this book eminently engaging. It will also be of great interest to public commentators, charitable organizations and NGOs concerned with wealth and income distributions.

Resilience and the Localisation of Trauma in Aceh, Indonesia Catherine Smith 2018 The globalisation of psychiatry has helped shape the way suffering and recovery is experienced in Aceh, Indonesia, a region with a long history of violent conflict. In this book, Catherine

Smith examines the global reach of the contested yet compelling concept of trauma, which has expanded well beyond the bounds of therapeutic practice to become a powerful cultural idiom shaping the ways social actors understand the effects of violence and imagine possible responses to suffering. In Aceh, conflict survivors have incorporated the globalised concept of trauma into local languages, healing practices and political imaginaries. The incorporation of this globalised idiom of distress into the Acehnese medical-moral landscape provides an ethnographic perspective on suffering and recovery, and contributes to contemporary debates about the globalisation of psychiatry and its ongoing expansion outside the domain of medicine.

Capitalist Nigger Chika Onyeani 2025-11-02 'Provocative, daring, acerbic but truthful - Capitalist Nigger exposes the endemic frailties that debilitate and dehumanize the Black race - into dependency, complacency, low esteem and inaction - as if these were divinely ordained. Onyeani's tirade is angry but affectionate; it is a tongue-lashing but genuinely concerned about the fate of his race. As usual in life, this kind of truth scathes the ears. After all, charity begins at home with one's own race.' -Dr Michael C Malherbe, Professor & Chair, Africana Studies/Humanities Department, Hostos Community College of the City of New York 'This is a book of passionate outrage and collective self-reproach. The beginning of self-reform is self-criticism. This author manifests a combination of anguish, anger and patriotism.' -Ali A Mazrui, D Phil (Oxon), Albert Schweitzer Professor in the Humanities, Director of Global Cultural Studies, Binghamton University Capitalist Nigger excels as an explosive and jarring of the Black race. The book asserts that the Negroid race, as naturally endowed as any other, is culpably a non-productive race. The Black race is a consumer race and depends on other communities for its culture, its language, its feeding, and its clothing. Despite enormous natural resources, Blacks are economic slaves because they lack the 'devilmay-care' attitude and 'killer-instinct' of the Caucasian, as well as the spider web mentality of the Asian. Capitalist Nigger contends that only as 'Economic Warriors', employing the 'Spider Web Economic Doctrine', can the Black race escape from their victim

mentality.

Vital Moments Thomas Allen 2026 Vital Moments traces a literary history of vitalism from the early nineteenth century to the present. Vitalist perspectives, associated with important philosophers such as Henri Bergson, attribute thought, feeling, and agency to nonhuman life and seemingly inanimate matter. By showing how American writers of the Romantic period embedded such ideas in their representations of the nonhuman world, Vital Moments offers a crucial prehistory of our current fascination with vitalism, which we encounter in theories of living worlds such as the Gaia Hypothesis and other scientific, literary, and cinematic responses to climate change.
