Aquaculture Pathophysiology Frederick S.B. Kibenge 2022-08-26 *Aquaculture Pathophysiology, Volume I. Finfish Diseases* is a diverse, practical reference on finfish diseases impacting aquaculture. This volume should be read in partnership with volume 2 on shellfish diseases as the principles and approach to the diagnosis and management of aquacultured animal species are similar and typically researchers, teachers, students, diagnostic laboratory scientists, aquaculture technicians and farmers need to be competent across both finfish and shellfish health issues. - A focus on the disease process of major or emerging viral, bacterial, fungal, and parasitic infections affecting aquacultured finfish species e.g. salmonids, carp, tilapia, eel, barramundi - A focus on important or emerging environmental, nutritional, genetic, deformity, toxicological, endocrine disruption and neoplastic diseases in finfish - A review of the immunology of finfish relevant to a practical understanding of disease diagnosis and management - An overview of laboratory diagnostic methods relevant to detection of finfish diseases - Concise discussion on the diverse risk factors of finfish diseases and options for their control

Encyclopedia of Virology: D-H 2008 A reference source that deals with the research in virology. It covers biological, molecular, and medical topics concerning viruses in animals, plants, bacteria and insects. It also offers coverage on AIDS and HIV, viral immunology and vaccines, and the origin, history, evolution and phylogeny of viruses. "Encyclopedia of Virology, Third Edition" continues its success as the largest single reference source of current research in virology. Unique in its use of concise 'mini-review' articles, this praised work covers biological, molecular, and medical topics concerning viruses in animals, plants, bacteria and insects. Now in five volumes, this new edition has been extensively revised and updated to reflect the 50 per cent increase in identified and accepted viruses since the year 2000. With over 25 per cent new chapters and over 1000 illustrations, this edition takes into account the new developments in virology research by including information on new emerging diseases such as avian flu, SARS and West Nile and the ability of some viruses to be used as agents of bioterrorism. Edited by leading Virologists Mahy and van Regenmortel, this third edition remains the number one all-inclusive source of information for virology researchers, students, and reference departments of academic, medical, and corporate libraries. This title offers extensive coverage on AIDS and HIV, viral immunology and vaccines, the economic importance and control of virus diseases, and the origin, history, evolution and phylogeny of viruses. The OIE Global Conference on Aquatic Animal Health, Bergen, Norway, 9-12 October 2006 Betty Dodet 2007 Aquaculture is one of the fastest growing industries globally; its production volume currently represents over 40% of all fisheries and within a few years will surpass that of traditional fisheries. New species and methodologies contribute to the fact that new emerging diseases are increasingly being discovered within this field, and aquatic animal welfare issues are only just beginning to be considered. This OIE Global Conference on Aquatic Animal Health was an opportunity for the OIE and its Member Countries to help build a framework for improved involvement and cooperation between the authorities (Veterinary and Fish Health, Fisheries and Environment), the scientific community and the private sector on aquatic animal health and welfare; help clarify the roles and responsibilities of all stakeholders in the process of early disease detection, rapid response and reporting; help increase aquatic animal health emergency response capabilities; exchange information on emerging diseases and animal welfare issues; help develop a science-based approach to the management of aquatic animal health and welfare; and present the valuable experience gained in the past few years. Following the presentations and discussions, recommendations were developed to better define roles and responsibilities and to assist in the evaluation and improvement of the current standards and guidelines for better control of infectious aquatic animal health, and the preparedness of countries for aquatic animal disease emergencies.
