Conspiracy Theories Aaron John Gulyas 2016-02-22
Narratives based on conspiratorial and paranoid thinking have become increasingly prominent throughout the 20th and 21st centuries. From the prosaic to the outlandish, conspiracy theories involve aliens and Nazis, underground bases and mind control technology. They range from sinister tales of malevolent reptilian beings infiltrating our government to fears of the New World Order rounding up patriotic Americans and putting them into internment camps. These stories and their underlying concerns have a long history in the U.S. and have often been bolstered by revelations of real conspiracies and cover-ups by private and public entities. This book examines conspiracy theories and the narratives constructed by those who believe and propagate them,

providing a unique view of U.S. history and highlighting fears both founded and unfounded.

Tales from the Time Loop David Icke 2003 Tales from the Time Loop is the most comprehensive book yet written about the global conspiracy that emerges more clearly every day. David Icke

has been warning for well over a decade of the plan for a world fascist state, a global version of Nazi Germany, in which the people will be prisoners of a Big Brother dictatorship founded on the suppression of the most fundamental freedoms and total control and surveillance. Today there is a gathering awareness that he was right. People are realising that Big Brother is no longer "coming." He's here.

The Paranormal Source Book Jenny Randles 1999 This revised edition contains all the main paranormal topics, ranging from apparitions and zoological mysteries, to ball lightning, crop circles, ESP, poltergeists, premonitions and UFOs, as well as new information on conspiracy theories, ancient wisdom and electronic pollution. The author gives details of the main cases in each area plus up-to-the-minute events, thinking, research and experiments. It also offers a comprehensive reading list of books and publications available within

each topic, and addresses of recommended research organisations around the world.
