*Medical Devices and In Vitro Diagnostics* Christian Baumgartner 2023-08-26 This updatable reference work gives a comprehensive overview of all relevant regulatory information and requirements for manufacturers and distributors around medical and in-vitro diagnostic devices in Europe. These individual requirements are presented in a practice-oriented manner, providing the reader with a concrete guide to implementation with main focus on the EU medical device regulations, such as MDR 2017/745 and IVD-R 2017/746, and the relevant standards, such as the ISO 13485, ISO 14971, among others. This book offers a good balance of expert knowledge, empirical values and practice-proven methods. Not only it provides readers with a quick overview about the most important requirements in the medical

device sector, yet it shows concrete and proven ways in which these requirements can be implemented in practice. It addresses medical manufacturing companies, professionals in development, production, and quality assurance departments, and technical and medical students who are preparing themselves for a professional career in the medical technology industries.

## **Handbook of Medical Device Regulatory Affairs in Asia**

Jack Wong 2013-03-27 Medical device regulation in Asia has gained more importance than ever. Governments and regulatory bodies across the region have put in place new regulatory systems or refined the existing ones. A registered product requires a lot of technical documentation to prove its efficacy, safety, and quality. A smooth and successful registration process dem

Usability, Accessibility and

Ambient Assisted Living

Alexandra Queirós 2019-01-21  
 Worldwide, the population ageing is a reality. The concept of Active Ageing, adopted by the World Health Organization, aims to guarantee quality ageing and appears as a strategy to solve this demographic challenge. The technological solutions might have a key role in the promotion of human functioning and in the mitigation of disabilities, particularly those resulting from the natural ageing process. This perspective is evident in the development of Ambient Assisted Living (AAL) solutions. In this context, it is relevant to know about the recent developments in AAL and discuss future trends and challenges in this area. One of the objectives of this book is to do a systematic literature review on AAL, not only considering the technology used, but also the health condition that is intended to improve. For this purpose, we consider the human functioning, in particular the

conceptual model of International Classification of Functioning, Disability and Health (ICF). Considering that the ICF conceptual framework is accepted within the healthcare domain, the use of its concepts and terminologies to promote multidisciplinary approaches for AAL solutions development processes can help to overcome difficulties of communication between users, careers and technological developers. AAL solutions must consider in their development the needs of the person that will use AAL solutions. The development must be user-centred and usability questions cannot be forgotten. In addition, the acceptance of the AAL solutions is closely related to the quality of the systems, so it is necessary to appropriately assess these solutions.

Clinical Evaluation Reports guides readers through clinical data evaluation of medical devices, in compliance with the EU MDR requirements and other similar regulatory requirements throughout the world. This book brings together knowledge learned as the author constructed hundreds of CERs and taught thousands of learners on how to conduct clinical data evaluations. This book will support training for clinical engineers, clinical evaluation scientists, and experts reviewing medical device CERs, and will help individual writers, teams and companies to develop stronger, more robust CERs. - Identifies and explains data analysis for clinical evaluation of medical devices - Teaches readers how to understand and evaluate medical device performance and safety in the context of new regulations - Provides analysis of new clinical evaluation criteria in the context of medical device design as well as in-hospital deployment and servicing

**Writing In-House Medical Device Software in Compliance with EU, UK, and US Regulations** Philip S. Cosgriff 2024-03-26 This book is a comprehensive guide to producing medical software for routine clinical use. It is a practical guidebook for medical professionals developing software to ensure compliance with medical device regulations for software products intended to be sold commercially, shared with healthcare colleagues in other hospitals, or simply used in-house. It compares requirements and latest regulations in different global territories, including the most recent EU regulations as well as UK and US regulations. This book is a valuable resource for practising clinical scientists producing medical software in-house, in addition to other medical staff writing small apps for clinical use, clinical scientist trainees, and software engineers considering a move into healthcare. The academic level is post-graduate, as readers will require a basic knowledge of software

**NABL Handbook for Medical Laboratories**

Tanmay Mehta  
Dr. Tanmay Mehta's NABL Handbook for Medical Laboratories: ISO 15189:2022 Simplified is a comprehensive guide for laboratory professionals navigating the ISO 15189:2022 standard. This book simplifies complex concepts, making it accessible to both experienced lab professionals and those new to accreditation processes. The book is valuable for laboratory managers, quality managers, and technical staff seeking to achieve or maintain NABL accreditation. It also serves as a quick reference guide during audits, internal assessments, and management reviews. Key Features: 1. Clause-by-Clause Explanation of ISO 15189:2022 Focused on NABL Accreditation in

straightforward language with practical examples and real-world scenarios. 2. Simplified Approach to Complex Processes such as Risk management and quality improvement, Nonconformities and corrective actions, Sample transportation, receipt, and storage, Evaluation of measurement uncertainty 3. The handbook includes tools, templates, and checklists for implementation, helping labs establish effective systems to ensure compliance and streamline audit processes. 4. A dedicated section addresses FAQs based on NABL assessor experiences, providing insight into what evaluators look for during assessments and audits. 5. Evidence-Based Compliance: For each clause, Dr. Mehta outlines the evidence and documentation required to demonstrate compliance, proving invaluable for labs preparing for NABL assessments.
