2015-09-17 This is the eBook of the printed book and may not include any media, website access codes, or print supplements that may come packaged with the bound book. For the introductory finance course—undergraduate corporate finance or financial management—required at all undergraduate business schools. Get the picture and develop a fundamental understanding of finance. Students often miss the big picture, viewing finance as a set of unrelated topics, tools, and techniques. In order to help students see the big picture, this

text provides an introduction to financial decision-making that links the concepts to five key principles of finance. Authors Arthur J. Keown, John D. Martin, and Sheridan Titman have incorporated significant revisions that weave currency, relevance, and real-world issues into the pages of this well-know finance text.

Financial Management Dr. Meenakshi Rathi
2023-01-04 Management processes like financial
management are focused with the allocation and
monitoring of capital. It was in the 20th century
that the field of finance management emerged as
its own academic discipline. Its previous use was
in the field of economics. Its fundamental
breadth as a field of study has evolved
throughout the years When it first emerged,
financial management's primary focus was on

securing capital for companies. However, from a
contemporary perspective, it is not only the
gathering of money but also their effective use
that constitute the fundamental tasks of the
financial management. In the modern day, a
company's financial issues are analyzed by the
financial management department. The term
"financial management" is used to describe the
process of overseeing a company's finances.
Funding, managing working capital, budgeting
for capital expenditures, and planning the
organizational capital structure are all part of
the finance department's responsibilities. As part
of this process, the company's monetary assets
must be managed and controlled. Further, it
provides the basis for future decisions on
growth, diversification, partnership, and
consolidation plans. Management of the
finance department is what we mean when we
talk about financial management. Finance is the
study and practise of directing, organizing, and
managing a business's money operations
