International Relations Theories Timothy Dunne 2013-01-03 Drawing on a wealth of expertise from an international team of contributors, the second edition of *International Relations Theories* presents a diverse selection of theoretical positions. Arguing that theory is central to explaining the dynamics of world politics, editors Tim Dunne, Milja Kurki, and Steve Smith cover a wide variety of theoretical positions—from the historically dominant traditions to powerful critical voices since the 1980s. The editors have brought together a team of international contributors, each specializing in a different theory. The contributors explain the theoretical background to their positions before showing how and why their theories matter. The book opens up space for analysis and debate, allowing students to decide which theories they find most useful in explaining and understanding international relations.

**Globalization: The Key Concepts** Annabelle Mooney 2007-03-12 Viewed as a destructive force or an inevitability of modern society, globalization is the focus of a multitude of disciplines. A clear understanding of its processes and terminology is imperative for anyone engaging with this ubiquitous topic. *Globalization: the Key Concepts* offers a comprehensive guide to this cross-disciplinary subject and covers concepts such as: homogenization neo-Liberalism risk knowledge society time-space compression reflexivity. With extensive cross-referencing and suggestions for further reading, this book is an essential resource for students and interested readers alike as they navigate the literature on globalization studies.

**Basque Nationalism and the Spanish State** André Lecours 2007-07-13 An examination of Basque nationalism from a historical perspective. Basque nationalism has been extensively examined from the perspectives of Basque culture and internal conditions in the Basque Country, but André Lecours is among the first to demonstrate how Basque nationalism was shaped by the many forms and historical phases of the Spanish state. His discussion employs one of the most debated approaches in the social sciences—historical institutionalism—and it includes an up-to-date examination of the circumstances for, and consequences of, recent events such as ETA's announcement in 2006 of a permanent cease-fire. Lecours also analyzes other aspects of Basque nationalism, including the international relations of the Basque Autonomous Government, as well as the responses of the contemporary Spanish state and how it deploys its own brand of nationalism. Finally, the book offers a comparative discussion of Basque, Catalan, Scottish, Flemish, and Quebecois nationalist movements, suggesting that nationalism in the Basque Country, despite the historical presence of violence, is in many ways similar to nationalism in other industrialized democracies. *Basque Nationalism and the Spanish State* is an original and provocative discussion that is essential reading for anyone interested in the Basques or in the development of modern nationalist movements.

**Decentralization and Development Partnership** Fumihiko Saitō 2003-11-20 This book provides the kind of on-the-ground look at the process and results of decentralization that we have been missing in the debates over "decentralization" and in efforts to plan for more effective meeting of people's needs through a process of devolved responsibility and financing, especially in Africa. Norman Uphoff, Director, Cornell International Institute for Food, Agriculture and Development Cornell University, U.S.A.

**Engagement with Culture in Transformative Times** Susanne Janssen 2025-05-12 At the heart of this volume are the questions: What does culture mean to European citizens in the face of globalisation, digitalisation, diversity, and social inequality? How do Europeans engage with culture in its various forms,

and what societal values are tied to this cultural engagement? These questions are explored in depth across the 15 chapters of this book. By delving into the understandings, practices, perceptions, affordances, and impacts of culture, this book advances the study of the societal values of culture in contemporary European societies, offering insights beneficial to both research and cultural policy work. The book stands out with its five unique features. It embraces an inclusive conception of culture, spanning the arts, popular culture, and everyday cultural practices, both offline and online. It takes a grassroots approach, starting from the cultural understandings and experiences of European citizens. It employs a comparative method involving people from diverse socio-economic groups in nine European countries – with different cultural policy models, social-structural features, socio-cultural value orientations, and media systems. It builds on a multi- and mixed-methods approach, including a large-scale survey, a smartphone study with experimental stimuli, several phases of online content data collection and analysis, qualitative interviews, and focus groups. Finally, it delves into how wide-ranging and interconnected sociocultural transformations such as migration, digitalisation, and social inequality impact people's understanding of and engagement with culture as well as the meanings and values they attribute to culture. These unique features promise to offer a fresh and comprehensive perspective on cultural engagement in contemporary European societies. The collection showcases the multiple, often contradictory concepts and understandings of culture and its societal values among social groups within and across European societies. The findings call for a "social turn" in cultural policy that extends beyond traditional arts and culture to support diverse cultural expressions that may enhance social values, address complex social issues, and shift the focus from economic objectives to promoting civic solidarity, equity, inclusivity, tolerance, and shared community values.

**Transatlantic Politics and the Transformation of the International Monetary System** Michelle Frasher 2013-09-05 With original archival documents and interviews from the US and Europe, Michelle Frasher brings the reader into the negotiating room with American, German, and French officials as they confronted the collapse of the Bretton Woods monetary system and made decisions that affected the course of European integration and the contemporary neoliberal order. She identifies crisis as the catalyst for change in international monetary policies, but argues that the causes of crisis originated from a multitude of factors such as market speculation, American hegemony, institutional flaws, and ideational conflicts among the leaders themselves. Far from a planned and consensual process, this book shows that the transformation to neoliberalism was riddled with discord and fret with trial and error. She argues that the resulting currency regime allowed governments to entrench themselves in national interests and facilitated the "marketization" of the state, where states have become both clients and participants in the financialized global economy—to the detriment of international stability. Frasher's is the first work to connect the 1960s and 1970s to the difficulties of inter-state and inter-market cooperation that have plagued the system in the last decades, and it puts the 2008 debacle into historical perspective.

**Governing Transformative Technological Innovation** Peter W. B. Phillips 2007 New technologies often appear to be beyond the control of any governing systems. This is especially true for transformative technologies. This book examines the deep governing structures of transformative technology and innovation in an effort to identify which actors can be expected to act when, under what conditions and to what effect.

*China and the New Silk Road* Harald Pechlaner 2020-05-04 This book studies the Chinese "Belt and Road Initiative" (BRI), also called "New Silk Road", and focuses on its regional and local effects. Written by experts from various fields, it presents a range of case studies on the geopolitical, socio-economic, ecological and cultural implications of the BRI for European regions and their stakeholders. The book is divided into four parts, the first of which discusses the history of and China's motivations for the BRI. The second part explores the global phenomenon from a number of regional standpoints. In turn, the third part presents studies on the political, socio-economic, cultural and ecological implications of the New Silk Road project. The final part highlights the tourism prospects in connection with the Silk Road project, as tourism has established itself as an important economic sector in many regions along the historic Silk Road. This book will appeal to scholars of economics, international relations and tourism, decision-makers, managers, chambers of commerce and entrepreneurs with special interests in establishing collaboration with the Chinese market.

**Policy and Politics of Reform** Judie Lynn Svihula 2005

*Global Transformations* David Held 1999 In this book, the authors set forth a new model of globalization that lays claims to supersede existing models, and then use this model to assess the way the processes of globalization have operated in different historic periods in respect to political organization, military globalization, trade, finance, corporate productivity, migration, culture, and the environment. Each of these topics is covered in a chapter which contrasts the contemporary nature of globalization with that of earlier epochs. In mapping the shape and political consequences of globalization, the authors concentrate on six states in advanced capitalist societies (SIACS): the United States, the United Kingdom, Sweden, France, Germany, and Japan. For comparative purposes, other states—particularly those with developing economies—are referred to and discussed where relevant. The book concludes by systematically describing and assessing contemporary globalization, and appraising the implications of globalization for the sovereignty and autonomy of SIACS. It also confronts directly the political fatalism that surrounds much discussion of globalization with a normative agenda that elaborates the possibilities for democratizing and civilizing the unfolding global transformation.
