Exploring Cynthia Krebs 2014 This book offers full, comprehensive coverage of Access. Move students beyond the point-and-click. The goal of the Exploring series is to move students beyond the point and click, to understanding the why and how behind each skill. And, because so much learning takes place outside of the classroom, this series provides learning tools that students can access anywhere, any time. Students go to college now with a different set of skills than they did years ago. With this in mind, the Exploring series seeks to move students beyond the basics of the software at a faster pace, without sacrificing coverage of the fundamental skills that everyone needs to know. NOTE: Before purchasing, check with your instructor to ensure you select the correct ISBN. Several versions of Pearson's MyLab & Mastering products exist for each title, and registrations are not transferable. To register for and use Pearson's MyLab & Mastering products, you may also need a Course ID, which your instructor will provide. Used books, rentals, and purchases made outside of Pearson If purchasing or renting from companies other than Pearson, the access codes for Pearson's MyLab & Mastering products may not be included, may be incorrect, or may be previously redeemed. Check with the seller before completing your purchase.

The O'Leary Series: Microsoft Office 2013 Linda O'Leary 2013-07-26 Timothy and Linda O'Leary Microsoft Office 2013: A Case Approach Making Office Relevant Timothy and Linda O'Leary and the Computer Information Technology Team at McGraw-Hill Higher Education offer your students a fully integrated learning program with time-tested quality and reliability. Office 2013: A Case Approach offers a running case study throughout the text to help students understand the material in a consistent, relevant environment. Through the theme "Making Office Relevant," this text helps students understand why they need this course and skills. Updated for Office 2013, student success is assured through clear step-by-step instruction, plentiful screen captures, and conceptual explanations. Each lab, designed to be covered

in 1 hour of class time, combines conceptual coverage with detailed software-specific instructions. The labs opens with a running case study that highlights real-world applications of each software program and leads students from problem to solution. The O'Leary Series helps students learn specific applications skills along with skills that cross all Office applications, which is especially important in mastering this version of Office. The O'Leary Series correlates with SIMnet Online, McGraw-Hill's online training and assessment program for Microsoft Office skills and basic computer concepts. Projects, however, are 1:1 within the SIMgrader component and allow students to practice their skills live in the Office application to receive immediate feedback via autograding. This integration with SIMnet helps meet the diverse needs of students and accommodate individual learning styles. Additional textbook resources can be found on the text's Online Learning Center: www.mhhe.com/olearyoffice2013.
