**Liberating Service Learning and the Rest of Higher Education**

**Civic Engagement** Randy Stoecker 2016-05-23 "[This book] questions the prioritization and theoretical/philosophical underpinnings of the core concepts of service learning: 1. learning, 2. service, 3. community, and 4. change. By 'liberating' service learning, [the author] suggests reversing the prioritization of the concepts, starting with change, then community, then service, and then learning. In doing so, [the author] clarifies the benefits and purpose of this work, arguing that it will create greater pedagogical and community impact. [This book] challenges--and hopefully will change--our thinking about higher education community engagement."--

First published in 1946, and now in its Seventh Edition, the Handbook has long been considered the definitive guide to the field of developmental science. Volume 1, Theory and Method, presents a rich mix of classic and contemporary theoretical perspectives, but the dominant views throughout are marked by an emphasis on the dynamic interplay of all facets of the developmental system across the life span, incorporating the range of biological, cognitive, emotional, social, cultural, and ecological levels of analysis. Examples of the theoretical approaches discussed in the volume include those pertinent to human evolution, self regulation, the development of dynamic skills, and positive youth development. The research, methodological, and applied implications of the theoretical models discussed in the volume are presented. There is a paradigm shift that involves increasingly greater understanding of how to describe, explain, and optimize the course of human life for diverse individuals living within diverse contexts.
