The Oxford American Book of Great Music Writing Marc Smirnoff 2012-01-01 Not only have a breathtaking array of musical giants come from the South—think Elvis Presley, Robert Johnson, Louis Armstrong, Jimmie Rodgers, to name just obvious examples—but so have a breathtaking array of American music genres. From blues to rock & roll to jazz to country to bluegrass—and areas in between—it all started in the American South. Since its debut in 1996, The Oxford American's more-or-less annual Southern Music Issue has become legendary for its passionate and wide-ranging approach to music and for working with some of America's

greatest writers. These writers—from Peter Guralnick to Nick Tosches to Susan Straight to William Gay—probe the lives and legacies of Southern musicians you may or may not yet be familiar with, but whom you'll love being introduced, or reintroduced, to. In one creative, fresh way or another, these writers also uncover the essence of music—and why music has such power over us. To celebrate ten years of Southern music issues, most of which are sold-out or very hard to find, the fifty-five essays collected in this dynamic, wide-ranging, and vast anthology appeal to both music fans and fans of great writing.

### **The New Guitarscape in Critical Theory, Cultural Practice and Musical Performance**

Kevin Dawe 2017-07-05 In *The New Guitarscape*, Kevin Dawe argues for a re-assessment of guitar studies in the light of more recent musical, social, cultural and technological developments that have taken place around the instrument. The author considers that a detailed study of the guitar in both contemporary and cross-cultural perspectives is now absolutely essential and that such a study must also include discussion of a wide range of theoretical issues, literature, musical cultures and technologies as they come to bear upon the instrument. Dawe presents a synthesis of previous work on the guitar, but also expands the terms by which the guitar might be studied. Moreover, in order to understand the properties and potential of the guitar as an agent of music, culture and society,

the author draws from studies in science and technology, design theory, material culture, cognition, sensual culture, gender and sexuality, power and agency, ethnography (real and virtual) and globalization. Dawe presents the guitar as an instrument of scientific investigation and part of the technology of globalization, created and disseminated through corporate culture and cottage industry, held close to the body but taken away from the body in cyberspace, and involved in an enormous variety of cultural interactions and political exchanges in many different contexts around the world. In an effort to understand the significance and meaning of the guitar in the lives of those who may be seen to be closest to it, as well as providing a critically-informed discussion of various approaches to guitar performance, technologies and techniques, the book includes discussion of the work of a wide range of guitarists, including Robert Fripp, Kamala Shankar, Newton Faulkner, Lionel Loueke, Sharon Isbin, Steve Vai, Bob Brozman, Kaki King, Fred Frith, John 5, Jennifer Batten, Guthrie Govan, Dominic Frasca, I Wayan Balawan, Vicki Genfan and Hasan Cihatter.
