English in the Disciplines
Christoph Hafner 2018-08-06
The context for the teaching
and learning of English for
specific disciplinary purposes
is undergoing profound
changes under the influence of
economic globalization and

new digital communication technologies. English in the Disciplines demonstrates how fundamental principles of ESP, to tailor language learning materials to the needs of specific groups of learners, can be adapted to new contexts of learning in the digital age. Based on sustained research into students' experiences in an ESP context in Hong Kong, this volume provides an empirically grounded and practical methodology to ESP learning and course design and features:

- mixed-method case studies;
- links between theory and practice, with plentiful examples of teaching materials and learning activities;
- recognition of the effect of new technologies and globalization on the practice of ESP, highlighting problems and providing practical solutions;
- a new pedagogical model for ESP course design, addressing multiple dimensions relevant to today's ESP learners including learner autonomy, genre, multimodality and digital literacies, plurilingual practices, and project-based

learning and collaboration.

English in the Disciplines provides key reading for anyone studying and researching this topic.

each unit containing a menu of learning outcomes, and an end-of-unit checklist with 'Can do' tick boxes Teaches English in context, so students practise the language and skills they need for the job in real work situations Real-world profiles from genuine professionals in the 'It's my job' section offer authentic and engaging insights into the industry Extra facts, figures, quotations, and specialist terminology included in the top margin of unit pages Additional activities and tests in the Teacher's Resource Book make the course suitable for mixed-ability classes The Teacher's Resource Book provides specialist background to the industry for every unit, as well as industry tips to support non-expert teachers Project work in the Student's Book, additional activities on the Student's Site, and a Key words list of essential vocabulary at the end of every unit provide extra opportunities for revision

A Supplement to the Oxford English Dictionary: O-Scz R. W. Burchfield 1972 Supplement to

the Oxford dictionary of the English language, comprising new words and senses of the period from 1884 to the present day - replaces the earlier (1933) supplement.

Oxford English for Careers: Technology 2. A course for pre-work students who are studying for a career in information technology Alison Pohl 2008 Technology 2 is a course for pre-work students studying on information technology-related courses, who will need to communicate accurately in English at work. This resource is written for pre-work students, studying at pre-intermediate to intermediate level, who will need to use English in work situations. This resource develops the vocabulary, language, and skills that students will need to communicate effectively when presenting an idea to non-specialists, problem-solving, and discussing the latest technological innovations. Each unit includes grammar tests and communication activities. A student book, teacher book

and class CD is included in the set. Table of contents: * Ways in to technology * Food and agriculture * Bridges and tunnels * Plastics * Alternative energy * Aeronautics * Future homes * Mass transportation * Petroleum engineering * Environmental engineering * Robotics * Household technology * Defence technology * Electronics * Career development.

The Peter Fookes Engineering Geological Legacy in Geomodels,

Geomaterials and Geomorphology J.S. Griffiths 2025-11-04 This book is a celebration of the life, work and legacy of Professor Peter G. Fookes (1933-2020). As a professional engineering geologist, he worked in over 100 countries, produced some 200 publications and was instrumental in setting up MSc programmes at Imperial College and Queen Mary College, London. From the Geological Society he was awarded the William Smith Medal (1985) and was the first recipient of the Glossop Medal (1996). Although a mainstream geologist, his background in chemistry ensured he was at the forefront in concrete research and the use of geomaterials. Working with academic geomorphologists (notably Denys Brunsdon, David Jones, John Doornkamp and Sir Ron Cooke), he led the development of 'engineering geomorphology' as a genuine adjunct subject to engineering geology. In addition, his Glossop Lecture set engineering geology along the
