*Partitive Cases and Related Categories* Silvia Luraghi 2014-08-29 Argument-marking, morphological partitives have been the topic of language specific studies, while no cross-linguistic or typological analyses have been conducted. Since individual partitives of different languages have been studied, there exists a basis for a more cross-linguistic approach. The purpose of this book is to fill the gap and to bring together research on partitives in different languages.

The approach has also proved to have fruitful practical applications in a number of areas such as language teaching, lexicography, translation studies and computer-aided translation. This volume contains twelve studies comparing linguistic phenomena in English and seven other languages. The topics range from comparisons of specific lexical categories and word combinations to syntactic constructions and discourse phenomena such as cohesion and thematic structure. *Cross-Linguistic Perspectives on Verb Constructions* Signe Oksefjell Ebeling 2015-09-10 This volume sheds new light on verb constructions by exposing them to cross-linguistic analysis based on multilingual corpora. It is composed of nine studies which provide insights into various aspects of cross-linguistic diversity, including showing that seemingly equivalent verb constructions may differ in their semantics, and that similar meanings may be expressed by different types of constructions. In other words, this book shows that different languages have different ways of lexicalising verb-based meanings, most notably by means of other, divergent verb constructions. A range of lexicogrammatical aspects of verb constructions are explored throughout the book, including time reference; modality; voice; light verb constructions; non-finite complementation of lexical verbs; posture-verb constructions; semiperiphrastic constructions; and the construction and semantic composition of verbs of putting. All of the contributions consider English in comparison with at least one of the following languages: Czech, German, Lithuanian, Norwegian, Spanish, and Swedish. As such, this volume offers a truly multilingual perspective on verb constructions. The diversity of comparisons also highlights the multi-faceted nature of the verb phrase, which seems to have virtually limitless potential for exploration in the fields of tense, aspect, modality, lexical semantics, syntax, and phraseology.
