Family Businesses in Transition Economies Léo-  
Paul Dana 2015-03-25 This book presents the  
reader a comprehensive understanding of the  
development of family business in transitional  
economies. Throughout eastern Europe, post-  
Communist countries transitioning to market-  
based economies are obtaining a variety of  
results due to diverse policy approaches. Expert  
contributions in this book draw from a wealth of  
information in this context and include thought-  
provoking policy prescriptions for the future.  
This book concentrates on the challenges to  
predict the direction emerging markets will take,  
particularly when dealing with the wide-ranging  
social and economic situations taking place in  
post-Communist Eastern Europe. This reference  
volume for policymakers, educators, investors,  
and researchers also provides a much-needed

and timely survey of family firms in the transitioning markets of post-Communist Europe.

*The Ties that Bind* Katherine L. French  
2016-02-17 This collection of essays, whose title echoes that of her most well-known book, celebrates the career of Barbara A. Hanawalt, emerita George III Professor of British Studies at The Ohio State University. The volume's contents -- ranging from politics to family histories, from intimate portraits to extensive prosopographies -- are authored by both former students and career-long colleagues and friends, and reflect the wide range of topics on which Professor Hanawalt has written as well as her varied methodological approaches and disciplinary interests. The essays also mirror the variety of sources Professor Hanawalt has utilized in her work: public documents of the law courts and chancery; private deeds, charters, and wills; works of both religious and secular literature. The collection not only illustrates and

reinforces the influence of Barbara Hanawalt's work on modern-day medieval studies, it is also a testament to her inspiring friendship and guidance during a career that has now spanned more than three decades.

**The Tao of Cosmos** Zhen G. Ma 2024-07-23 • Connects the philosophy of the I Ching with key recent advances in cosmology, such as the Big Bang theory, Roger Penrose's cyclic conformal cosmology, and his and Stuart Hameroff's cosmic quantum brain dynamics • Explains the Taoist cosmology of Heaven-Humanity Oneness in the context of Teilhard de Chardin's evolutionism, Thomas Berry's cosmogenetic trinity, and Brian Swimme's 12 cosmological powers • Examines the holographic unity of Heaven, Earth, and Humankind at microcosmic, mesocosmic, and macrocosmic scales Is the universe inert and empty, or is it in some way responsive to consciousness? Breathing new life into a question that has perplexed philosophers since ancient times and scientists for the last

century, physicist Zhen G. Ma, Ph.D., offers a quantitative “theory of everything” that beautifully integrates ancient I Ching philosophy, Eastern Taoism, modern cosmology, and the quantum brain dynamics of consciousness. Sharing insights from his years of research on space physics and black-hole spacetime—complemented by studies in quantum brain dynamics and cosmological powers with Brian Swimme at the California Institute of Integral Studies—Ma explains how his integrated theory draws primarily on two key paradigms in the philosophy of cosmology and consciousness: Swimme’s cosmic creation story of the universe as a green dragon and Roger Penrose and Stuart Hameroff’s cosmic consciousness. Extending these theories further, Ma shows how they harmonize not only with the ancient Eastern philosophy of the oneness of heaven and humanity, but also with a holographic cosmic principle that connects the quantum-plasma brain with the universe and

earth with heaven. He then looks at this holographic unity in the cyclic process of birth, growth, decay, and death and shows how it resonates with Einstein-Friedmann’s cosmological dynamics and Hawking-Penrose’s quantum gravity model. Demonstrating a quantitative paradigm of everything, Ma shows how humanity is inextricably and holistically blended into the cosmic fabric of the universe. Rāshid al-Ghannūshī Mohammad Dawood Sofi 2018-04-24 This book discusses various dynamic facets of the life of Rāshid al-Ghannūshī, a distinguished Islamic thinker and activist not only in Tunisia and North Africa, but in the entire Muslim world. It especially focuses on those aspects related to his intellectual understanding and response to a number of critical contemporary issues. In the 21st Century, Rāshid al-Ghannūshī is considered as the most moderate among the Muslim thinkers and intellectuals, particularly when it comes to the question of Islam-democracy compatibility

and power sharing theory. This book also offers an account of a previously little known, yet much talked about Muslim voice in the post-Arab Spring era. It further shows how the intellectual Muslim thinkers' own perspectives and expectations from Islamic movement(s) and their interaction with the 'western oriented local leadership', as well as their (secular) policies color their understanding of Islam and various other major issues.

**The Western Experience, Volume 1, with**

**Primary Source Investigator** Mortimer

Chambers 2007-08-27 The Western Experience offers a thorough, analytical overview of Western civilization, giving students an introduction to the major achievements in Western thought, art, and science as well as the

social, political, and economic context for understanding those developments. To demonstrate the connected nature of all histories, these various aspects of history are examined in an integrated way. To help readers develop their reasoning and writing skills, each chapter is constructed to serve as an example of a historical essay: A historical problem is presented and arguments are developed using historical evidence. The ninth edition features many improvements, including the work of Lisa Tiersten in her new chapter on Nineteenth Century Empires.

**Royalists, Radicals, and les Misérables** Eric Martone 2014-10-02 The year of 1832 marked a turning point in France as the country struggled to find its way in the wake of the French Revolution. Following the Revolution of 1830, Legitimists, supporters of the recently ousted Bourbon dynasty's claim to the throne, continued to plot against King Louis-Philippe and his "July Monarchy." In early 1832, after

failing to launch a coup in Southern France, Legitimists plotted an unsuccessful uprising in the Vendée, a region in Western France that had supported the royalist cause during the French Revolution. The Duchesse de Berry led the rebellion in the hopes of placing her son, the Bourbon heir, on the French throne. The revolt marked the last attempt by the Bourbons to retake the throne by force and helped solidify the end of the Bourbon dynasty. During the cholera outbreak, which also spread throughout France in 1832, lower income areas suffered higher losses to the disease, for they were more likely to have contaminated water supplies. The lower classes spread rumors that the outbreak was an elitist plot to subdue the masses and the epidemic exacerbated class tensions. Meanwhile, conditions in France continued to be characterized by violence during the early 1830s as Louis-Philippe attempted to establish his regime's authority. The most significant of these uprisings was the republican-dominated June

Revolution of 1832. Victor Hugo and other contemporaries perceived the barricades of June as natural extensions of the cholera epidemic, or the “political continuation of a biological crisis.” The sad fate of the uprising, however, prompted republicans to regroup and develop new strategies for success. As a whole, then, 1832 helped solidify the end of the Bourbon monarchy and class identities, and was a crucial moment in the (re)organization and growing solidification of French republicanism that paved the way for the Revolution of 1848. This edited collection examines these three pivotal events in French history in 1832—a royal Legitimist uprising led by the Duchesse de Berry, the cholera epidemic, and the June Revolution (featured in the climax of Hugo’s novel, *Les Misérables*)—within the context of the legacy of the French Revolution. While the events of 1832 are significant, they have been relatively ignored because scholars have been distracted by the Revolutions of 1830 and 1848. This collection is the first piece of

scholarship to examine these three events in an interconnected pattern to better examine France as it transitioned from a monarchy to a republic. As a result, this collection will be of value to both historians and academics studying diverse subfields within French and European studies.
