**Three California Houses** Aaron Betsky 2002 "Presented in significant detail are the Palm Springs House, by renowned mid-century modernist architect Craig Ellwood; the extravagant Malibu Spanish-style House, with interior renovations by renowned Italian architect Ettore Sottsass; and the opulent Beverly Hills House, by the most famous of the 1920s Mediterranean-style architects, George Washington Smith - with interiors that have been reworked recently by the avant-garde California architect Coy Howard."--BOOK JACKET.

*Journal of the Society of Architectural Historians* Society of Architectural Historians 1991 Includes special issues.

**Case Study Houses.** Ediz. inglese, francese e tedesca Elizabeth A. T. Smith 2002 Modernist experimental homes. Prototypes for everyone The Case Study House program (1945-66) was an exceptional, innovative event in the history of American architecture and remains to this day unique. The program, which concentrated on the Los Angeles area and oversaw the design of 36 prototype homes, sought to make available plans for modern residences that could be easily and cheaply constructed during the postwar building boom. The program's chief motivating force was Arts & Architecture editor John Entenza, a champion of modernism who had all the right connections to attract some of architecture's greatest talents, such as Richard Neutra, Charles and Ray Eames, and Eero Saarinen. Highly experimental, the program generated houses that were designed to re-define the modern home, and thus had a pronounced influence on architecture - American and international - both during the program's existence and even to this day. TASCHEN brings you a monumental retrospective of the entire program with comprehensive documentation, brilliant photographs from the period and, for the houses still in existence, contemporary photos, as well as extensive floor plans and sketches.

**Experiments in Modern Living** Milton Cameron 2012-05-01 When a group of brilliant young scientists arrived in Australia's national capital after World War II to take up leading roles in the establishment of national research institutions, they commissioned Australia's leading architects to design their private houses. The houses that resulted from these unique collaborations rejected previous architectural styles and wholeheartedly embraced modernist ideologies and aesthetics. The story of how these progressive clients contributed to the innovative design of their houses brings fresh insights to mid-twentieth-century Australian domestic architecture and to Canberra's rich cultural history.

**Homes Dot com** Chris Johnson 2004 Summary: Written by the NSW Government Architect, this book sets out to challenge the way our homes are currently designed, built and purchased. He advocates a much greater input by the best architects into mass housing and better relationships between architect and client using the latest and best computer design programs.

**The Banham Lectures** Jeremy Aynsley 2009-11 A collection of essays by leading critics who are inspired by Reyner Banham's revolutionary work. Each critic presents their own analysis of a key issue in design, architecture or art. The essays explore topics such as: clothes and carpets, photography, the history of bedrooms, how cities grow, the architecture of museums, dematerialisation and the future of design.

**Blueprints for Modern Living** Elizabeth A. T. Smith 1999 Includes eight main essays as well as contributions from Elizabeth A.T. Smith, this volume documents the Case Study House Program, carried out between 1945 and 1966 where 36 experimental prototype houses were built by leading Californian architects.

**The Work of Charles and Ray Eames** Donald Albrecht 1997 Charles and Ray Eames gave shape to America's twentieth century. From the 1940s to the 1970s, the Los Angeles-based husband-and-wife team practiced design at its most virtuous and its most expansive: their furniture, toys, buildings, films, graphics, exhibitions, and books all aimed to improve society - not only functionally but also culturally and intellectually. While designers with a social mission are now regarded with some skepticism, in the Eameses' time it was plausible that designers, businessmen, and government leaders had common goals, and their mutual aims were considered in their country's best interest. This volume is published on the occasion of a major exhibition organized by the Library of Congress, Washington, D.C., and the Vitra Design Museum, Weil am Rhein, Germany, the holders of the two richest Eames collections in the world. The book takes a multifaceted approach to the

multifaceted careers of Charles and Ray Eames. Rather than focus on separate aspects of their work, the book examines the Eameses' projects in the contexts of science, corporate patronage, and politics as well as those of modern design, architecture, and art.

**Hans Heyerdahl Hallen** Kathi Holt 2025-10-16 Traces the migrations of architect Hans Heyerdahl Hallen (1930-2022), revealing how European philosophies were fused with local vernacular practices to shape modernist architecture in South Africa.

**Case Study Houses** Elizabeth A. T. Smith 2006 Because most opinion, both profound and light-headed, in terms of post war housing is nothing but speculation in the form of talk and reams of paper, it occurs to us that it might be a good idea to get down to cases and at least make a beginning in the gathering of that mass of material that must eventually result in what we know as "house-post war".

**Iconic LA** Gloria Koenig 2000 The 12 buildings of Iconic LA, identifiable the world over, demonstrate the personality and power of Los Angeles as a major metropolis. Each of these buildings has played a role in the human drama- rife with intrigue, political struggle, tragedy, and triumph.

**Women and the Making of the Modern House** Alice Friedman 1998-03 Explores the challenges that unconditional attitudes and ways of life have presented to architectural thinking and to the architects themselves. Photos.

**Architectural Record** 1989-09

**California Modern** Neil Jackson 2002 In the 1950s, a series of dramatic, open, and elegant homes made him a media star, and interest in the work of his atelier has only increased over time."

**Pierre Koenig** James Steele 1998 Koenig designed some of Los Angeles' most admired houses and was a pioneer of what came to be described as the 'Case Study House Program'. This is the first comprehensive survey of his entire career and includes photographs, sketches and drawings.

**The Culture of Silence** Malcolm Quantrill 1998 Playwright Bertold Brecht once observed that "the Finns are silent in two languages". The intent of this collection of essays is to explore why the Finns are resistant to discourse, speculating these impenetrable boundaries may have resulted from the architectural culture of modern Finland. Architects, students, and general readers alike will find this book thought-provoking and informative. 52 photos. 25 line drawings.

**AA Files** 1990

**Case Study Houses** Elizabeth A. T. Smith 2019 Le programme Case Study House représente un événement sans précédent dans l'histoire de l'architecture américaine. Chantre du modernisme, John Entenza en fut la force motrice et appela certains des plus grands noms de l'architecture, dont Richard Neutra, Charles et Ray Eames ou Eero Saarinen, à y participer. Cette rétrospective célèbre chacun des 36 prototypes de maison à travers une documentation complète agrémentée de plans, croquis et photos.

**Blueprints for Modern Living** Elizabeth A. T. Smith 1989 This book documents Arts & Architecture magazine's sponsorship of some of the most important architects of the region and the generation reflecting an unprecedented commitment to reinventing the house as a way of redefining living.

**Bracket 3** Lola Sheppard 2022-03-18 Bracket [at Extremes] includes critical articles and unpublished design projects that investigate architecture, infrastructure and technology as they operate in conditions of imbalance, negotiate tipping points and test limit states. We are conditioned, as designers of the built environment, towards the organization of people, programs and movement. Indeed the history of modern urbanism, architecture and building science has been predicated on an anti-entropic notion of programmatic and social order. But are there scenarios in which a state of extremity or imbalance is productive? Bracket [at Extremes] seeks to understand what new spatial orders emerge in this liminal space. How might it be leveraged as an opportunity for invention? What are the limits of wilderness and control, of the natural and artificial, the real and the virtual? What new landscapes, networks, and urban models might emerge in the wake of destabilized economic, social and environmental conditions?
