Cai Guo-Qiang Rachel Rivenc 2025-06-24 This groundbreaking book provides the first material study of the celebrated contemporary artist Cai Guo-Qiang, known worldwide for his use of subversive materials, particularly gunpowder. Cai Guo-Qiang (China, b. 1957) is among the most prominent contemporary artists active today. His prolific, diverse creative practice--which includes gunpowder drawings and paintings, explosion events, videos, multimedia installations, and site-specific works--draws on a personal belief system that freely blends symbols and tenets from Eastern and Western traditions. Cai's output seeks to establish dialogues among different cultures, different periods of time, and even different species--always while probing our shared humanity and the connections that can be divined across space and time, out of chaos and disorder. Based on in-depth interviews between the author and artist and with studio assistants, as well as extensive examination, sampling, and scientific analysis of a wide range of artworks, this publication addresses the implications of Cai's distinctive materials and processes and their associated conservation issues. Written for conservation scientists, conservators, specialists in contemporary art history, museum curators, collections managers, practicing artists, collectors, and art enthusiasts, this book offers insights into the life, methods, and materials of a leading figure in the art world. The technical discussions provide essential findings that will inform strategies for the future care of his works.

Teaching Chemistry Jan Apotheker 2019-05-06 Teaching Chemistry can be used in courses focusing on training for secondary school teachers in chemistry. The author, who has been actively involved in the development of a new chemistry curriculum in The Netherlands and is currently chair of the Committee on Chemistry Education of the International Union of Pure and Applied Chemistry, offers an overview of the existing learning models and gives practical recommendations how to implement innovating strategies and methods of teaching chemistry at different levels. It starts at the beginner level, with students that have had no experience in secondary schools as a teacher. After a solid background in the theory of learning practical guidance is provided helping teachers develop skills and practices focused on the learning process within their classrooms. In the final chapter information is given about the way teachers can professionalize further in their teaching career. Addresses innovative teaching methods and strategies. Includes a section of practical examples and exercises in the end of each chapter. Written by one of the top experts in chemistry education. Jan Apotheker taught chemistry for 25 years at the Praedinius Gymnasium, Groningen. In 1998 he became a lecturer in chemistry education at the University of Groningen, retired in 2016. He is currently chair of the Committee on Chemistry Education of the IUPAC.
