Bibliography of Art and Architecture in the Islamic World (2 vols.) Susan Sinclair

2012-04-03 Following the tradition and style of the acclaimed Index Islamicus, the editors have created this new Bibliography of Art and Architecture in the Islamic World. The editors have surveyed and annotated a wide range of books and articles from collected volumes and journals published in all European languages (except Turkish) between 1906 and 2011. This comprehensive bibliography is an indispensable tool for everyone involved in the study of material culture in Muslim societies.

The different aspects of islamic culture UNESCO

2016-10-17 This series of volumes on the manifold facets of Islamic culture is intended to acquaint a very wide public with the theological bases of its faith; the status of the individual and of society in the Islamic world; its expansion since the revelation; its cultural manifestations in literature and the arts; and finally, Islam today between loyalty to its past and the new challenges of modernity.

Islamic Culture Farid Younos 2013-11 "Islamic Culture: A Study of Cultural Anthropology," illustrates Islamic culture from an anthropological point of view. It shows that Islam as a way of life relates to all cultural aspects based upon the tradition of its Prophet, Mohammad. For the first time, this study shows that the Prophet of Islam is the founder of Islamic culture and this culture is not an inherited concept but based upon a revelation received from God.

Understanding Islamic Sciences, Second Edition Murtada Mutahhari 2019-01-01

Understanding Islamic Sciences provides an informative introduction to six major disciplines in Islamic studies: theology, mysticism, principles of jurisprudence, jurisprudence, philosophy, and logic. It is a user-friendly guide for readers wishing to know more about Islam's intellectual heritage but who are averse to the scholastic language and style of technical books on the subject. The work is also an ideal textbook for introductory courses in Islamic Studies. Each chapter is dedicated to one of the aforementioned Islamic sciences and includes a survey of the historical development of the discipline, biographies of scholars who have made significant contributions to the subject, and explanations of the most important concepts and issues discussed in each discipline. This second edition has been extensively revised and contains a new chapter on logic, a glossary of technical terms, and four indices. An interesting and wide-ranging text, displaying the clarity of a major modern Islamic thinker and his approach to Islamic sciences.' Oliver Leaman, Professor of Philosophy, University of Kentucky

Gandhism in Theory and Practice Nripendra Chandra Banerji 1923

Understanding Islamic Architecture Attilo Petruccioli 2013-09-13 The ongoing debate among practitioners and in academia about the meaning and understanding of Islamic architecture will be energized by this book. It contains essays by architects and academics from various parts of the world which clarify how the various disciplines of the design profession can be employed to build in the spirit of Islam. Divided into three sections the book covers: *meaning from Faith, which draws meaning from the Islamic faith in order to

propose a built environment that is universally beneficial *analysis of History, which examines historical buildings and planning concepts, and suggest how to apply lessons learned to contemporary practice *contemporary Trends, which discusses current trends in architecture, education and socio-economic aspects of various Muslim countries. Illustrated throughout, this book will appeal to students and scholars, practising architects and planners alike.
