Smart Buildings and Cities with Remote Sensing and GIS Shiv Mohan 2025-03-31 The built environment is undergoing a profound transformation driven by the integration of cutting-edge geospatial technologies. Smart Buildings and Cities with Remote Sensing and GIS serves as a comprehensive guide to navigating this transformation and bridges the gap between traditional architectural and planning practices and the innovative possibilities of remote sensing (RS) and geographic information systems (GIS). The book demonstrates how architects, planners, and decisionmakers can use GIS and RS to design smarter, context-aware, and eco-friendly urban spaces. It explores innovative approaches for architecture, focusing on geospatial site analysis, net-zero energy building designs, heritage preservation, innovative virtual campus planning methodologies and even futuristic concepts like habitat design on the lunar surface. Key features:

- Brings together contemporary geospatial technologies and their applications to address the challenges and opportunities in designing smart buildings and cities.
- Provides actionable solutions for professionals, researchers, and policymakers.
- Includes global contributions that provide diverse perspectives on smart city and building applications.
- Highlights how geospatial data-driven insights can revolutionize decisionmaking processes in urban planning and building design. The work is designed for postgraduate students and researchers in the departments of architecture, planning, and geomatics, geoinformatics, software engineering.

Site Analysis James A. LaGro, Jr. 2013-01-31 The process-oriented guide to context-sensitive site selection, planning, and design Sustainable design is responsive to context. And each site has a unique set of physical, biological, cultural, and legal attributes that presents different opportunities and constraints for alternative uses of the site. Site analysis systematically evaluates these on-site and off-site factors to inform the design of places including neighborhoods and communities that are attractive, walkable, and climate-resilient. This Third Edition of Site Analysis is fully updated to cover the latest topics in low-impact, location-efficient design and development. This complete, user-friendly guide: Blends theory and practice from the fields of landscape architecture, urban planning, architecture, geography, and urban design Addresses important sustainability topics, including LEED-ND, Sustainable Sites, STAR community index, and climate adaptation Details the objectives and visualization methods used in each phase of the site planning and design process Explains the influence of codes, ordinances, and site plan approval processes on the design of the built environment Includes more than 200 illustrations and eight case studies of projects completed by leading planning and design firms Site Analysis, Third Edition is the ideal guide for students taking courses in site analysis, site planning, and environmental design. New material includes review questions at the end of each chapter for students as well as early-career professionals preparing for the ARE, LARE, or AICP exams.

Drawing from Practice J. Michael Welton 2015-04-10 Drawing from Practice explores and illuminates the ways that 26 diverse and reputable architects use freehand drawing to shape our built environment. Author J. Michael Welton traces the tactile sketch, from initial parti to finished product, through words, images, and photographs that reveal the creative process in action. The book features drawings and architecture from every generation practicing today, including Aidlin Darling Design, Alberto Alfonso, Deborah Berke, Marlon Blackwell, Peter Bohlin, Warren Byrd, Ellen Cassilly, Jim Cutler, Chad Everhart, Formwork, Phil Freelon, Michael Graves, Frank Harmon, Eric Howeler and Meejin Yoon, Leon Krier, Tom Kundig, Daniel Libeskind, Brian McKay Lyons, Richard Meier, Bill Pedersen, Suchi Reddy, Witold Rybczynski, in situ studio, Laurinda Spear, Stanley Tigerman, and Tod Williams Billie Tsien Architects. Included is a foreword by Robert McCarter, architect, author and professor of architecture.

100 Site Analysis Essentials Peter Farrall 2024-01-19 How do I follow a brief? What is the site's context? What's its history and what is adjacent to it now? How have other designers responded to similar site conditions? Conducting a site analysis is an essential part of the design process. Through careful examination, observation and documentation, you can cultivate a deeper understanding of the place you are designing. Designed to help students understand what a 'site analysis' is and why it is valuable to their design proposals, this book provides 100 easy-to-follow rules of thumb with simple line drawings and illustrations to help. Through a series of lenses, strategies and ideas, this book provides step-by-step guidance through the process to increase your understanding of a place and how to deliver the appropriate solution for your site. Supported by case studies with examples of tackling specific problems, you will develop the tools to explore, rationalise and convince others that your approach is right for the project.

Advances in Informatics and Computing in Civil and Construction Engineering Ivan Mutis 2018-10-08 This proceedings volume chronicles the papers presented at the 35th CIB W78 2018 Conference: IT in Design, Construction, and Management, held in Chicago, IL, USA, in October 2018. The theme of the conference focused on fostering, encouraging, and promoting research and development in the application of integrated information technology (IT) throughout the life-cycle of the design, construction, and occupancy of buildings and related facilities. The CIB - International Council for Research and Innovation in Building Construction - was established in 1953 as an association whose objectives were to stimulate and facilitate international cooperation and information exchange between governmental research institutes in the building and construction sector, with an emphasis on those institutes engaged in technical fields of research. The conference brought together more than 200 scholars from 40 countries, who presented the innovative concepts and methods featured in this collection of papers.
