**The Worlds of Back to the Future** Sorcha Ní Fhlainn 2014-01-10 A critical examination of the cultural, cinematic, and historical contexts of the Back to the Future trilogy, this book provides a multi-focal representation of the trilogy from several interdisciplinary fields, including philosophy, literature, music, pop culture, and media and gender studies. Topics include sexual symbolism in the trilogy and the oedipal plotting of the first film; nostalgia and the suburban dream in the cultural climate of the 1980s; generic play and performance throughout the trilogy; the emotional and narrative force provided by the films' renowned musical scores; the trilogy's post-modern references and allusions to the Western genre; female representations across the trilogy; and the Lacanian philosophical constructs in the characterizations of Doc Brown and George and Marty McFly.

**Research within the Disciplines** Peggy Keeran 2014-04-28 Research within the Disciplines is designed to help reference librarians - and students studying to become librarians - gain that deeper understanding of disciplinary differences that allows them to comfortably solve information needs rather than merely responding to questions, and practical knowledge about how to work with researchers in a library setting. The book has three chapters that cover the disciplines at the broadest level - humanities, social sciences, and sciences, plus supplemental chapters that focus on associated disciplines (research in history, business, and engineering, research using government sources) and across disciplines (interdisciplinary and critical information literacy). For the second edition of Research within the Disciplines, several chapters have been added that together give a broader and deeper overview of research across all subject areas: research practices of creative and performing artists and of clinical scientists, research in international documents, research strategies for foreign language materials, and visual literacy across the disciplines. Major shifts in technology have been accounted for that have changed how we do research and have expanded the range of resources available to researchers in all disciplines. All of the chapters have been rewritten or heavily revised; this is much more a new book than a new edition.

**Cultural Afterlives and Screen Adaptations of Classic Literature** H. Shachar 2012-07-17 Film and television adaptations of classic literature have held a longstanding appeal for audiences, an appeal that this book sets out to examine. With a particular focus on Wuthering Heights, the book examines

adaptations made from the 1930s to the twenty-first century, providing an understanding of how they help shape our cultural landscape.

**Screen Adaptation** Deborah Cartmell 2010-06-23 Adaptation studies has historically been neglected in both the English and Film Studies curricula. Reflecting on this, Screen Adaptation celebrates its emergence in the late 20th and 21st centuries and explores the varieties of methodologies and debates within the field. Drawing on approaches from genre studies to transtextuality to cultural materialism, the book examines adaptations of both popular and canonical writers, including William Shakespeare, Jane Austen and J.K.Rowling. Original and provocative, this book will spark new thinking and research in the field of adaptation studies. Mapping the way in which this exciting field has emerged and shifted over the last two decades, the book is also essential reading for students of English Literature and Film.
