The Body in Contemporary Art  
Sally O'Reilly 2009 This international survey presents art made over the last two decades in which the human form is central. From painting and sculpture to installation, video art, and performance, it examines the roles played by the body in art, from being the subject of portraiture to becoming an active presence in participatory events. Organized thematically, the book focuses on subjects such as nature and technology, the grotesque, identity politics, and the place of the individual in society. Featuring work by artists such as Matthew Barney, Marlene Dumas, Olafur Eliasson, Oleg Kulik, and Ernesto Neto, it shows how the body continues to be pivotal to the understanding and expression of our place in the universe.

This edited book addresses ways in which 'bodies' conceived broadly - get languaged, and ways in which ideas of 'normalcy' and 'normal' bodies are held in place and reproduced. The articles show how it is through this medium that people with ailments or 'unusual' bodies get positioned and slotted in certain ways. The present volume represents a departure from other works in at least two ways. First, it brings in discourses around bodies per se into language-related research, a realm that previous research has not directly engaged. Second, it ushers in discussions about bodies by critically addressing the language by which experiences

around bodily breakdowns and ailments occur. Calling attention to a host of discourses - biomedical, societal, poststructuralist - and drawing on a variety of disciplinary perspectives, critical theories, ethnographically gathered materials, and extant data, the chapters pierce the general veil of silence that we have collectively drawn regarding how some of our most intimate body (dis)functions impact our everyday living and sense of "normalcy".

*China's Avant-Garde, 1978-2018* Daria Berg 2022-11-11 This book examines how China's new generation of avant-garde writers and artists are pushing the boundaries of vernacular culture, creatively appropriating artistic and literary languages from global cultures to reflect on reform-era China's transformation and the Maoist heritage. It explores the vortex of cultural change from the launch of Deng

Xiaoping's reforms in 1978 to Xi Jinping establishing his leadership for life in 2018. The book argues that China's new avant-garde adopt transcultural forms of expression while challenging the official discourse of Xi Jinping's regime, which promotes cultural nationalism and demands that cultural production in China embodies the essence of the "Chinese nation". The topics range from body art, women's poetry and boys' love literature to Tibetan fiction and ceramic art. The book shows how the avant-garde use the new digital media to bypass government censorship, transcending China's virtual frontiers while breaking new ground for an emerging public sphere. Overall, the book provides a rich picture of the nature of China's avant-garde art and literature and the challenges it poses for the Chinese government.
