Legal Rights and the Institutional Imagination Hamish Ross 2026-04-02 This book presents a contemporary perspective on legal rights centred on the longstanding will theory-interest theory debate. Starting with classical rights literature, central aspects of the debate in its modern idiom are contextualised within a social theory setting developed from the writings of Max Weber. The book explores the idea that the institutional and coercive character of legal enforcement necessitates viewing legal rights as a locus of social power residing within the 'institutional imagination': that is, in the decision-making of key institutional actors such as judges, prosecutors, police, governmental authorities - and ultimately supreme court judges - who routinely mobilise coercive mechanisms towards the enforcement of legal rights and powers. This marks a departure from the trend of rights literature to view legal rights largely from the standpoint of the right-holder. The book also touches on whether the emerging perspective points towards a 'third way' beyond the traditional two theoretical approaches. A major task of the study is the construction of an archetypal supreme court judge - personifying the 'institutional imagination' - fashioned, via Weberian sociology, from a critique of Ronald Dworkin's 'Herculean' judge and measured against doctrinal exegesis that draws on sources which include UK higher appellate court judgments.

Property Rights: A Re-Examination J. E Penner 2020-02-14 Ranging over a host of issues, Property Rights: A Re-Examination pinpoints and addresses a number of theoretical problems at the heart of property theory. Part 1 reconsiders and rejects, once again, the bundle of rights picture of property and the related nominalist theories of property, showing that ownership reflects a tripartite structure of title: the right to immediate, exclusive, possession, the power to license what would otherwise be a trespass, and the power to transfer ownership. Part 2 explores in detail the Hohfeldian theory of jural relations, in particular liberties and powers and Hohfeld's concept of 'multital' jural relations, and shows that this theory fails to illuminate the nature of property rights, and indeed obscures much that it is vital to understand about them. Part 3 considers the form and justification of property rights, beginning with the relation an owner's liberty to use her property and her 'right to exclude', with particular reference to the tort of nuisance. Next up for consideration is the Kantian theory of property rights, the deficiencies of which lead us to understand that the only natural right to things is a form of use- or usufructory-right. Part 3 concludes by addressing the ever-vexed question of property rights in land.

Distributive Justice and World Trade Law Oisín Suttle 2017-10-12 What does justice demand in international trade regulation? And how far does World Trade Organization (WTO) law respond to those demands? Whether our focus is developing countries, struggling industries, or environmental protection, distributive conflict is a pervasive feature of international economic law. Despite this, we lack an adequate theory of distributive justice for this domain. Drawing on philosophical approaches to global justice, this book advances a novel theory of justice in trade regulation, and applies this to explain and critique the law of the WTO. Integrating theoretical and doctrinal approaches, it demonstrates the potential for political theory to illuminate and inform the progressive development of WTO law, including rules on border measures, discrimination, trade remedies and domestic regulation. Written from an interdisciplinary perspective, accessible to lawyers, philosophers and political scientists, the book will appeal both to theorists interested in building bridges from theory to practice, and practitioners seeking new perspectives on existing problems.

Central Issues in Jurisprudence Nigel E. Simmonds 2013 La 4e de couverture indique : "Central Issues in Jurisprudence is a clear introduction to the major theories and arguments which currently dominate discussion in jurisprudence. The work enables readers to read the original writers with a real understanding of how the theories relate to each other, and how these theories cluster around certain fundamental issues. Combining lucid exposition with commentary, the author provides a penetrating analysis of each theory examined, and a deep understanding of the problems addressed."

A Dialogical Concept of Minority Rights Hanna H. Wei 2016-04-26 In A Dialogical Concept of Minority Rights, Hanna H. Wei demonstrates that a more plausible and realistic concept of minority rights should consist of not only rights against the state but also rights against the group. She formulates and defends three separate but related rights to dialogue, and thoroughly analyses how they may operate not only to maintain a healthy balance between the minorities' need to be culturally distinct and their need to relate to and belong in the larger society, but also that they address the generalisations and presuppositions on which the debate of multiculturalism has been based, and constitute the first step of a possible solution to many of the theoretical and practical difficulties of minority protection.

Central Issues in Jurisprudence Nigel E. Simmonds 1986 Concerning itself with the nature of law and legal reasoning, and with the concepts of justice and individual rights, jurisprudence seeks to set legal ideas in the wider context of moral and political theory. To study jurisprudence properly, you need to read books by such authors as Rawls, Nozick, Hart and Dworkin. It is not, or should not be, a matter of ploughing through a textbook that merely tells you about these books. Nevertheless, a student needs some preliminary orientation. This book aims to provide a brief guide to the major theories and arguments which dominate discussion in jurisprudence. The object is to put the student, as quickly as possible, into a position where he or she can read the original writers with a real understanding of how their theories relate to each other, and of how these theories cluster around certain recurring fundamental issues.

Gender and Human Rights in Islam and International Law Shaheen S. Ali 2021-11-08 This important study offers a conceptual analysis of gender and human rights under Islamic law, state law and international law, and extends this analysis to a specific examination of the nature of women's rights in the Islamic tradition. It explores the disparity between the theoretical perspective on women's rights and its applications to Muslim jurisdictions, determined by elements of cultural practices, socio-economic realities and political expediences, and uses the example of Pakistan to demonstrate the divergence between the theory and practice of Islamic law in these jurisdictions. It discusses the concept of an emerging 'operative' Islamic law, which includes principles of Islamic law, secular codes and popular custom and usage.
