Geographical Identities of Ethnic America Kate A. Berry 2002 Twenty distinguished geographers examine the ways in which place fashions, recreates, and contextualizes human identity in North America. This volume discusses themes of population and habitat, displacement and circulation, resources and economic survival, through the experiences of several ethnic minorities. It covers such topics as Samoan communities in urban Southern California, South Asian migration to Canada, Native American health-care systems, and public housing for African Americans. Supported by statistical tables and graphs, maps, and photos that reflect a wide range of theoretical and historical approaches, the essays examine such topics as immigration, housing, and landscapes, complemented with discussions of religious ceremonies, women and marriage-mate selection, resource conflicts, health care, and social networking.

Multicultural Geographies John W. Frazier 2010-09-01 In an approach that differs from other publications on U.S. multiculturalism, *Multicultural Geographies* examines the changing patterns of race and ethnicity in the United States from geographical perspectives. It reflects the significant contributions made by geographers in recent years to our understanding of the day-to-day experiences of American minorities and the historical and current processes that account for living spaces, persistent patterns of segregation and group inequalities, and the complex geographies that continue to evolve at local and regional levels across the country. One of the book's underlying themes is the dynamic and complex nature of U.S. multiculturalism and the academic difficulty in evaluating it from a single viewpoint or theoretical stance. As such, *Multicultural Geographies* is derived from the joint efforts of selected scholars to bring together diverse perspectives and approaches in documenting the experiences of American minorities and the issues that affect them.
