*The International Baccalaureate Diploma Program and the School Library* Anthony Tilke 2011-03-11 This book, a blend of practice and theory, shows how the school library can contribute to the success of the International Baccalaureate Diploma Program. Written for librarians in schools that are applying to offer the program as well as those who already work with it, *The International Baccalaureate Diploma Program and the School Library: Inquiry-Based Education* provides information and strategies specifically relating libraries to the IBDP. The guide includes information about the IBDP ranging from the subject matrix to unique aspects of the program, such as the Theory of Knowledge course, the Extended Essay requirement, and the Learner Profile. The book also discusses other important features of IB programs, such as internationalism and academic honesty. Finally, it blends theory and practice by providing details and findings from the only two-year research study to follow students and teachers through the IBDP. The study demonstrates the role of the school library in the program, showing how both students and teachers used and valued it. Each chapter concludes with a series of points or strategies for the librarian to reflect upon and/or use as the basis of action.

*The Bible in the American Experience* Claudia Setzer 2020-09-07 An interdisciplinary investigation of the Bible's place in American experience Much has changed since the Society of Biblical Literature's Bible in American Culture series was published in the 1980s, but the influence of the Bible has not waned. In the United States, the stories, themes, and characters of the Bible continue to shape art, literature, music, politics, education, and social movements to varying degrees. In this volume, contributors highlight new approaches that move beyond simple citation of texts and explore how biblical themes infuse US culture and how this process in turn transforms biblical traditions. Features An examination of changes in the production, transmission, and consumption of the Bible An exploration of how Bible producers disseminate US experiences to a global audience An assessment of the factors that produce widespread myths about and nostalgia for a more biblically grounded nation

Since its creation, the curriculum upon which the programme is based has been continuously developed to take into account the rapidly changing needs of students, schools, higher education and employment contexts. For much of that time, the programme has included three essential components that must be undertaken by students who wish to graduate with the Diploma: Theory of Knowledge, Extended Essay and Creativity, Activity, Service (CAS). Taken together, over time these have come to be regarded as a "core" of the Diploma Programme, although they were not described as such at the outset. This edited collection is intended to provide input into the current review of the IB Diploma Programme. It comprises contributions from experienced authors - researchers and practitioners - who were invited to reflect upon the nature of the core as it exists at present, to raise issues in relation to the future development of the core, and to share experience in the learning and teaching of the core components across a wide range of schools, in both national and international systems of education. Questions concerning the concept of the core as a whole, developing students as internationally-minded thinkers, and the challenges of bringing coherence to the core in establishing a holistic approach to the curriculum, underpin the individual chapters throughout. Contributors: Edward Allanson, Tom Brodie, John Cannings, Christian Chiarenza, Mary Donnellan, Jenny Gillett, Robin Julian, Julian Kitching, Justin Laleh, Ann Lautrette, James MacDonald, Shona McIntosh, Heather Michael, Paul Regan, John Royce, John Sprague, George Walker.
