**How We Think and Learn** Jeanne Ellis Ormrod 2017-02-13 This book introduces readers to principles and research findings about human learning and cognition in an engaging, conversational manner.

**Human Learning** Jeanne Ellis Ormrod 1999 This leading book in learning theories explains principles and theories of human learning in a lucid and engaging fashion and lays out the application of those theories and principles to educational practice. Covers many topics throughout the book: chaining, cognitive aspects of applied behavior analysis, constructivist and contextual views of learning, effects of verbalization and enactment, dichotomies in long-term memory, mental theories, development of expertise, effects of alternative forms of assessment, self-regulated learning and epistemological beliefs, self-worth theory, and internalized motivation.

**Pseudo-retranslation** Mehmet Yildiz 2024-08-16 This book presents pseudo-retranslations as a new phenomenon of translational intertextuality, revealing how pseudo-retranslations establish large networks of intertextuality across academic works, how academic authors have recourse to this procedure as they create their academic texts, and how pseudo-retranslations contribute to the dissemination of translation-distorted scholarly knowledge and lead to epistemically polluted academic ecosystems. Pseudo-retranslation can be defined as an academic author's partial or complete exploitation of another academic author's translation and presenting it as a retranslation of the source text. This phenomenon, first documented in Yildiz (2021), arises from academic authors' failure to refer to or translate primary sources - particularly in English. Since there occurs no actual retranslation process, this procedure is called pseudo-retranslation. Using a range of academic texts from the Turkish context as case studies, the author presents the integral constituents of this phenomenon, and the behavioural patterns of its renderers. This book will be of particular interest to academics and postgraduates in the field of translation studies and (corpus) linguistics.

**Designing Robot Behavior in Human-Robot Interactions** Changliu Liu 2019-09-12 In this book, we have set up a unified analytical framework for various human-robot systems, which involve peer-peer interactions (either space-sharing or time-sharing) or hierarchical interactions. A methodology in designing the robot behavior through control, planning, decision and learning is proposed. In particular, the following topics are discussed in-depth: safety during human-robot interactions, efficiency in real-time robot motion planning, imitation of human behaviors from demonstration, dexterity of robots to adapt to different environments and tasks, cooperation among robots and humans with conflict resolution. These methods are applied in various scenarios, such as human-robot collaborative assembly, robot skill learning from human demonstration, interaction between autonomous and human-driven vehicles, etc. Key Features: Proposes a unified framework to model and analyze human-robot interactions under different modes of interactions. Systematically discusses the control, decision and learning algorithms to enable robots to interact safely with humans in a variety of applications. Presents numerous experimental studies with both industrial collaborative robot arms and autonomous vehicles.

**Faith and Learning** David S. Dockery 2012-05-01 Faith and learning, scholarship and piety, Christian tradition and intellectual inquiry, head and hearts: How do these things come together in an informative, enriching, and interdependent way? The calling of Christian higher education is to reflect the life of Christ and to shine the light of truth. That distinctive mission cannot be forced into an either/or framework but rather a both/and calling. It is a commitment to Jesus Christ himself, who is both fully God and fully human and who for Christian educators is both light and life. This multi-authored volume, with dynamic contributions from entry-level faculty members to seasoned scholars, explores the question of the Christian faith's place on the university campus, whether in administrative matters, the broader academic world, or in student life. Philosophy, Sociology, Science, Arts, Business, Media; Faith and Learning explores how significant Christian thinkers have addressed such topics and their related issues throughout the history of the church. The historical, theological, and biblical framework will help students interact with and engage contemporary challenges to the Christian faith in the various fields of study and inquiry. Contributors include Harry L. Poe, Gene C. Fant, Jr., Ken Magnuson, Klaus Issler, Gregory A.

Thornbury, Taylor Worley, John T. Netland, Scott Huelin, James A. Patterson, Hunter Baker, Roman R. Williams, Steve Halla, Christopher W. Mathews, Kevin Trowbridge, Mark Bolyard, Jeannette Russ, E. Blake Watkins, Mary Anne Poe, Emily Lean, Thomas Rosebrough, Ralph Leverett, Kimberly C. Thornbury, and C. Ben Mitchell.

**Our Minds, Our Memories** Jeanne Ellis Ormrod 2011 An engaging and conversational book about the basics of human thought and memory processes from a cognitive psychology perspective. While covering the fundamentals of how our brains think, learn, and remember, *Our Minds, Our Memories* also entertains the reader with a bright tone, engaging exercises, and thought-provoking examples. A textbook that doesn't look or read like a textbook, this new first edition teaches students and non-students alike about thought and memory from the perspective of cognitive psychology, information processing, and constructivism. Utilizing up-to-date educational psychology research, helpful visuals, and a conversational tone, *Our Minds, Our Memories* covers common misconceptions about learning and memory, reviews the basic anatomy of the brain and the human memory system, and explains why we forget much of what we experience. The book also helps readers acquire effective learning strategies and study habits for their own lives by exploring the subjects of critical thinking, mnemonics, metacognition, and problem solving. In order to help further their understanding of the material, each chapter includes exercises through which readers can see various aspects of cognition in their own thinking and learning.
