The Irish Homestead 1910
Essential Criminology Mark M. Lanier 2018-04-19 In the fourth edition of *Essential Criminology*, authors Mark M. Lanier, Stuart Henry, and Desire .M. Anastasia build upon this best-selling critical review of criminology, which has become essential reading for students of criminology in the 21st century. Designed as an alternative to overly comprehensive, lengthy, and expensive introductory texts, *Essential Criminology* is, as its title implies, a concise overview of the field. The book guides students through the various definitions of crime and the different ways crime is measured. It then covers the major theories of crime, from individual-level, classical, and rational choice to biological, psychological, social learning, social control, and interactionist perspectives. In

this latest edition, the authors explore the kind of criminology that is needed for the globally interdependent twenty-first century. With cutting-edge updates, illustrative real-world examples, and new study tools for students, this text is a necessity for both undergraduate and graduate courses in criminology.

LGBT Families Nancy J. Mezey 2015 Part of the Sage Contemporary Family Perspective series, this book presents a comprehensive an understanding of lesbian, gay, bisexual, and transgender families today by drawing upon and making sense of the burgeoning scholarly literature about LGBT families from the late twentieth and early twenty-first centuries.

First Contact Nancy A. Greenwood 2011-08-16 The Introduction to Sociology course is usually the first contact that students have with

the discipline of sociology. This course can determine whether students take other sociology courses or learn to use sociology in their lives as adults and citizens. First Contact identifies important issues facing instructors in introducing students to the sociological imagination. Drawing on the literature of teaching and learning in sociology and higher education more broadly, First Contact provides an overview of the scholarship of teaching and learning, best practices, and other essential information to create a successful first course in sociology. It walks the instructor through the course design process—from learning about whom your students are, determining appropriate course goals and learning objectives, and using these ideas to design, execute, and assess your course. It examines the core content of a first course. It discusses how to design a syllabus, select textbooks and readings, as well as how to design and deliver effective lectures, facilitate

good discussions, and other course delivery options. An invaluable resource for anyone teaching the introductory sociology course - including grad students, new professors, and seasoned instructors who seek renewal in their approach to teaching this critical course in the sociology curriculum.

The Pacific Reporter 1913

In Conflict and Order D. Stanley Eitzen 2001 This conflict perspective introductory paperback text emphasizes four themes: diversity, the struggle to achieve social justice, economic and global transformations in the U.S., and a global perspective. In *In Conflict and Order* studies the forces that lead to both stability and change in society. As it examines the standard topics in an introductory

course, the authors show how social problems are structural in origin. While the pace of social change is increasing, society's institutions are resistant to change. Eitzen and Baca Zinn challenge students to develop a sociological perspective by questioning their own basic beliefs, and to debate the facts rather than merely accepting the authors' way of looking at the world.
