Magika's command-line tool and language bindings are essentially wrappers around a compact deep learning model, optimized for efficient inference on standard CPUs. You can read about how Magika works, the models, the supported content types, the prediction modes, and notes on how to understand all parts of the output in the Core Concepts section of Magika's ... By open-sourcing Magika, we aim to help other software improve their file identification accuracy and offer researchers a reliable method for identifying file types at scale. Please use the official CLI (with pip install magika) as it can perform batch processing and search for files recursively. Read more about that in the main README. Apr 14, 2026 · What Magika Actually Is (And What It Isn't) Magika is a file content type identification system powered by a custom deep learning model. Not a malware detector. Not a threat classifier. Under the hood, Magika employs a custom, highly optimized model that only weighs about a few MBs, and enables precise file identification within milliseconds, even when running on a single CPU. In this paper, we introduce Magika, a novel AI-powered content-type detection tool. Under the hood, Magika employs a deep learning model that can execute on a single CPU with just 1MB of memory ... In essence, Magika clients are wrappers around deep learning models. We started with the standard_v1 model, but with time we developed more advanced models that support the detection of 2x content ...
