Books and Beyond Kenneth Womack 2008-10-30 There's a strong interest in reading for pleasure or self-improvement in America, as shown by the popularity of Harry Potter, and book clubs, including Oprah Winfrey's. Although recent government reports show a decline in recreational reading, the same reports show a strong correlation between interest in reading and academic achievement. This set provides a snapshot of the current state of popular American literature, including various types and genres. The volume presents alphabetically arranged entries on more than 70 diverse literary categories, such as cyberpunk, fantasy literature, flash fiction, GLBTQ literature, graphic novels, manga and anime, and zines. Each entry is written by an expert contributor and provides a definition of the genre, an overview of its history, a look at trends and themes, a discussion of how the literary form engages contemporary issues, a review of the genre's reception, a discussion of authors and works, and suggestions for further reading. Sidebars provide fascinating details, and the set closes with a selected, general bibliography. Reading in America for pleasure and knowledge continues to be popular, even while other media compete for attention. While students continue to read many of the standard classics, new genres have emerged. These have captured the attention of general readers and are also playing a critical role in the language arts classroom. This book maps the state of popular literature and reading in America today, including the growth of new genres, such as cyberpunk, zines, flash fiction, GLBTQ literature, and other topics. Each entry is written by an expert contributor and provides a definition of the genre, an overview of its history, a look at trends and themes, a discussion of how the literary form engages contemporary issues, a review of the genre's critical reception, a discussion of authors and works, and suggestions for further reading. Sidebars provide

fascinating details, and the set closes with a selected, general bibliography. Students will find this book a valuable guide to what they're reading today and will appreciate its illumination of popular culture and contemporary social issues.

Images in Law William Pencak 2016-05-13 What does 'the law' look like? While numerous attempts have been made to examine law and legal action in terms of its language, little has yet been written that considers how visual images of the law influence its interpretation and execution in ways not discernible from written texts. This groundbreaking collection focuses on images in law, featuring contributions that show and discuss the perception of the legal universe on a theoretical basis or when dealing with visual semiotics (dress, ceremony, technology, etc.). It also examines 'language in action', analyzing jury instructions, police directives, and how imagery is used in conjunction with contentious social and political issues within a country, such as the image of family in Ireland or the image of racism in France.

Raising the Bar Alvin L. Reid 2002 Two-thirds of today's teens are interested in having a meaningful relationship with God, yet less than one-third of them are active in a local church. These statistics indicate that it is time to change how the church does youth ministry, and this compelling book provides an impassioned plea for the church to set higher standards for ministry to teens and their families.

**Next** Michael Lewis 2002-05-17 The New York Times bestseller. "His book is a wake-up call at a time when many believe the net was a flash in the pan."—BusinessWeek With his knowing eye and wicked pen, Michael Lewis reveals how the Internet boom has encouraged changes in the way we live, work, and think. In the midst of one of the greatest status revolutions in the history of the world, the Internet has become a weapon

in the hands of revolutionaries. Old priesthoods are crumbling. In the new order, the amateur is king: fourteen-year-olds manipulate the stock market and nineteen-year-olds take down the music industry. Unseen forces undermine all forms of collectivism, from the family to the mass market: one black box has the power to end television as we know it, and another one may dictate significant changes in our practice of democracy. With a new afterword by the author.

*Dynamics of Critical Internet Culture (1994-2001)* Geert Lovink 2009 This study examines the dynamics of critical Internet culture after the medium opened to a broader audience in the mid 1990s. It is Geert Lovink's PhD thesis, submitted late 2002, written in between his two books on the same topic: *Dark Fiber* (2002) and *My First Recession* (2003). The core of the research consists of four case studies of non-profit networks: the Amsterdam community provider, The Digital City (DDS); the early years of the nettime mailinglist community; a history of the European new media arts network Syndicate; and an analysis of the

streaming media network Xchange. The research describes the search for sustainable community network models in a climate of hyper growth and increased tensions and conflict concerning moderation and ownership of online communities.
